where the crowds congregate there must be some attraction. Where the orders go there n be some inducements offered Our whole business is planned on the basis of giving our customers we can in quantity and quality for their money. Most business houses plan on the opposite be that is, give as little as possible for the money. Examine this catalogue, compare it with

RSONAL

other you may have at hand and see if it is not gotten up with your interests in view. Year by year our trade has extended. Year by year **O.K. Seeds** have been planted in n / localities until now there are but few postoffices that may not be termed branches of our seed ste where **O.K. Seeds** are received direct by planters throughout the length and breadth of the la To our old friends and patrons we return thanks. May they ever prosper as those people who plant **O.K. Seeds**. To the old customers of our house, and the new people who we hope

count as customers, we again send greetings. starts in auspiciously

Mammoth Seed House erected 1892, owned by us and used exclusively by us in handling O.K. Seeds and Man-Weight Tools.

Altho 1895 there have been extensive sh have a full crop in all lines, with few ex tions. An examination of prices in this c logue will show that we still furnish our **0** Seeds at the usual moderate prices.

TO ALL . . .

WHO BUY SEEDS.

OUR PRICES are as low as seeds of f them carefully before buying. We believe fair distribution of rewards and don't w "the earth," but only a small portion of i grow good seeds, and ask a fair profit when sell them. Farmers' orgenizations, such as Grange, Alliance, cic, recognize ourfair pr and patronize us. Parties buying seeds in j son at either of our stores will be given counts, to equal the postage we save and of expenses we incur in packing seeds for sh ment.

DISCOUNTS. It requires almost as long fill an order for one pack of seeds as for one dozen, and while our pr are as low as we can afford on single pack we will allow you very liberal discounts if order a dollar's worth. For instance,

FOR EVERY DOLLAR SELECT \$1.25 WORTH OF SEEDS IN PACKETS.

There is not another house in the country makes such a liberal offer. You don't need to buy more seeds t you need to get a discount. Any person can use a dollar's worth of seeds and everybody is entitled to the se discount. Seed at catalogue price and make 25 cents on every dollar's worth in packets. Make up a club. See all of your neighbors.

FREE BY MAIL. We deliver all our goods free by mail in 4-lb lots orn, at prices quoted, unless tated to the contrary. Keep this in mind when comparing prices. When seeds are sent by ireight or express the when comparing prices. when comparing proces, when seeds are set by height of the safe of the purchaser invariably pays the transportation charges, unless agreed to the contrary. You can get our choice O.K. Seeds at your postoffice, no difference where you live, as readily as though you came to our store in person.

We warrant all our seeds to be O.K. or all right, and WARRANTY, We warrant all our seeds to be **O.K.** or all right, and that they will grow with proper treatment, and be as represented, in so far that if they prove otherwise, we will refill the or-der or return the money. We exercise the greatest care to have all seeds pure, true and reliable, yet so many contingencies arise over which we have no control that we can not warrant

SPECIAL

the crop. If not accepted on these terms they must be returned at once.

OPENING MAIL.

13

OUR TERMS are cash with order. We have a great many orders to fill in the busy accounts. We will occasionally send goods C. O. D. if the order is from a reliable party. though it is an unnecessary expense for our customers to return the money for C. O. D. si ments.

HOW TO REMIT a Registered Letter. This is one of the best and most convenient ways to remit, and the sender gets a receipt for the letter as soon a reaches its destination. Every postmaster must register letters. Money Order, Ba Draft on New York, or Express. Stamps taken same as money in small amounts-1-c preferred.

OUR MAIL in the busy season is enormous, being more than can be delivered by a regular carrier, and we employ a special messenger to make frequent to to the city postoffice, which is five squares distant. 1,000 letters at a single deliver, s not unusual, and we have four or more deliveries each day, besides newspapers containing advertisements, circulars, samples, etc., swell the bulk greatly. The service of two clerks are requi from 8 o'clock in the morning till 10 o'clock at night to open the letters and mark the remittar s thereon. Our outgoing mail is so large as to excite surprise and comments from people passing We send several wagon loads to the postoffice every day after the season opens.

Fecu ... Red Letter ...Remarks

GOOD FRIEND—According to our regular custom, we again mail you our Annual Cataace, alike to customers and others whose names we have, and who we believe are engaged sultivating the ground to a greater or less extent, consequently need more or less seeds. It is a fact that we mail many Catalogues that do not bring us orders, yet we contend t every person who plants seeds **SHOULD**, and at some time **WILL**, send us an order n though it be only to get a change of seed of the old variety, **hence we dislike to** ce his name from our list. We also know that if tens of thousands of people who eive this Catalogue could be convinced of the **GREAT IMPROVEMENTS THAT LE YEARLY BEING MADE IN MANY VARIETIES OF VEGETABLES AND LAIN, THEY WOULD HASTEN TO INTRODUCE**

New Blood in Their Crops

ich will do more toward making farming pay than introducing new blood in their stock. If **YOU** are one who has received our Catalogue in years past and never sent us an der, we earnestly request a trial order for O. K. Seeds this season of 1895. An order for a package of seeds will be thankfully received, and as we give

A Present to Every Customer,

a can expect one or more packages of CHOICE SEEDS FREE, and if you write on order sheet a few names you can select ANOTHER PACKAGE, all for the triffing restment required for ONE PACKAGE OF SEEDS. Of course we hope you will ad more seeds, but if you do not, don't hesitate to take advantage of the above offers. e want YOU as a customer for O. K. SEEDS, we want to give you some oice novelty to show what O. K. SEEDS will do, and we want the names so we ay win other new customers for O. K. SEEDS.

An Extra Special Limited Offer.

Last Season we offered \$1.50 worth of seeds in packages for \$1.00 the season through. iring the month of March it is almost impossible to keep up with orders working day d night, and considering the fact that our prices on packages this season are individually wer than before, we will limit our offer of

1.50 WORTH OF SEEDS FOR \$1.00 TO FEBRUARY 20, 1895.

No other discounts can be used. They must be taken at prices given per packet. Send all orders on this basis before above date.

DO YOU REALIZE what Packet Seeds cost you? To illustrate: \$1.50 worth of acket Seeds for \$1.00 makes 4c pkts. cost 2³/₃c each, 5c pkts. 3³/₃c each, 10c pkts. 6³/₃c each, c pkts. 10c each. \$1.25 for \$1.00 makes 4c pkts. cost 4 1-5c, 5c pkts 4c, etc. Of no other use in the country can you get high grade seeds for as little money. Our packages we harahtee to be as well filled as those from any other house. We put up no half size pkts. ny family can use a dollar's worth of Package Seeds and take advantage of this discount. **ANOTHER REASON** why we can sell Package Seeds so cheaply is because we use

ANOTHER REASON why we can sell Package Seeds so cheaply is because we use actiones for putting them up. Just try to imagine a machine in which you put a lot of eds and packages and the filled packages are turned out at the rate of 40,000 daily. Yonderfull you exclaim. Yes, it is a wonder, and we invite all our friends to come i and see the wonderful machine do its work.

Special Offers On Onion Seed

One of our greatest specialties is **ONION SEED**. Notwithstanding the short crops and consequently general high prices, our crops have been fine and a full yield realized, therefore we propose to share the benefits with our customers. As it is not probable that we can buy Onion Seed later in the season to sell at the prices named below, it is understood that these prices may be withdrawn when our original stock is disposed of. For this reason it may be to your interest to order early. These prices are at purchaser's expense for transportation. If you want free delivery add 10c per lb.

	1 lb.	or more.
Genuine Prize Taker	\$1.85	\$1.75
Large Red Wethersfield	1.45	1.35
Yellow Globe Danvers	1.35	1.25
Large Red Globe	1.50	1.40
Large Yellow Globe	1.50	1.40
Large White Globe	2.50	2.40
White Silverskin, or Portugal	2.40	2.30
Extra Early Red	1.15	1.05

An order for 3 lbs. may be made up of more than one kind, but not less than 1 lb. of a kind will be sold at these rates.

Agents Wanted to Sell O. K. Seeds.

A large proportion of the people in every neighborhood send off for seeds every year. The balance save their seeds, or beg them, or buy them from commission boxes. Now nearly all these orders can be obtained for O. K. SEEDS if they were solicited and YOU will probably get them if we pay you for doing it. Now if you feel the pressure of hard times and want to make some money during the dull season, send for our

CONFIDENTIAL TERMS TO AGENTS.

Don't think that these confidential terms can be taken advantage of to procure a small lot of seed for your own planting. They can only be applied where the seeds are ordered by our agents to sell again or on orders already sold. If you want to sell O. K. Seeds—and we assure you it is the proper thing to do—send for

. . Agent's Complete Outfit

which will consist of A LIBERAL ASSORTMENT OF VEGETABLE AND FLOWEB SEEDS in beautiful lithographed packages, all our own original designs, making the most beautiful packages ever used by any seed house. These packages, with illustrations painted from nature, will be of great assistance in selling the seeds, but we assure all that we do not put the best on the outside. Two beautiful large, lithographed hangers, one of flowers and one of vegetables, a supply of annual catalogues of celebrated O. K. Seeds, special circulars, order sheets, envelopes, etc., with CONFIDENTIAL WHOLESALE CATALOGUE FOR AGENTS. Where we have no dealer handling the Man-Weight Machines, if you desire to sell them, mention the fact and WE WILL SEND OUTFIT FOR THEM, ALSO.

For above outfit, to prevent annoyance from curiosity seekers and applications from people who do not mean business, we are obliged to make a moderate charge of 50 centethe seeds alone are worth much more—which may be deducted when orders amount to \$5. Address all communications to

J. A. Everitt, Seedsman,

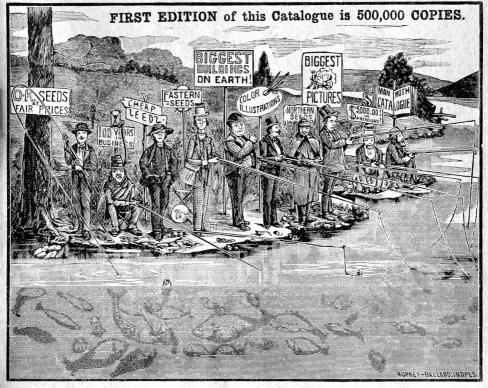

INDIANAPOLIS, IND.

CONTRAL LOCATION See "Indianapolis," on the first cover page. The centre of population is a few miles south-east of Indianapolis, and Indianapolis is the centre of the largest and richest agricultural region on the cent. We can deliver quickly and cheaply by freight and express. If there is no agent at your freight depot, you must send money with the order to pay freight.

THIS CATALOGUE Is not so large as some others, consequently it does not cost as much. It contains the standard varieties and novelties of merit. These are what you want. What we save in expense of our catalogues we deduct from the price of our seeds. This is all to the purchaser's advantage. While our catalogues a e not large individually, yet we send out twice as many as any other seedsman, and are ambitious to increase the number until every man or woman who plants a seed or tills a plant has a copy.

DON'T FORGET To sign your name and write your order plainly. We deliver to you free, seeds in pkts., ozs., ½ lbs., 4 lbs., pints and quarts. Larger quantities go by freight or expense.

MARKET GARDENERS And others who buy \$10.00 worth or more of seeds in bulk, send for our Special Wholesale Price List.

A FEW WORDS ABOUT SEEDSMEN.

Each seedsman has his particular reasons why he should receive the public's patronage. Consider carefully the induces ments they offer. A catalogue four times as large as this one could not offer many more varieties, but would cost §45,000 more for the number we distribute. This cost would be added to the price of the seeds. The Prize-Paying Seedsman puts up the price to warrant him in paying prizes to a few fancey gardeners. The ordinary gardener who has to hustle for a living never gets a prize, but he helps to pay them in every package of seed he buys. Cabbages bigger than a man and wheelbarrow may excite high hopes, but they are never realized. The Northern Seedsman deceives you in his broad claims. Seeds are grown North, East, South and West and then shipped to headquarters to distribute. We have as many northern you quicker and cheaper than from the far North. Reantiful lithographs please the eye, and often double the cost

Telephone 1256.

of seeds, because they are expensive, but the crop seldom equals your expectations. The **Biggest Buildings** do not shelter better seeds than those of a moderate size; high prices must be obtained to afford them. **Eastern Scedsmen** come west to grow the bulk of their seeds, then tell the dear public to "plant only Eastern Seeds," **Cheap Sceds appear** to not care for trade. He lacks ambition to land a fish when he gets a bite. If you buy from the seedsman **a long time in business**, you pay roundly for the privilege. Old relies always come high, and often times are not worth the money.

always come high, and oftentimes are not worth the money. Without any extravagant claims, but with a neat catalogue, no premiums, reasonable illustrations, seeds grown where they find a suitable soil and climate, backed by facilities for handling our trade in the center of the country, we offer our O. K. SEEDS, and sufficient experience as seedsmen to intelligently execute the orders entrusted to us. We cast out our line baited with "O. K. Seeds at Fair Prices." The public are not slow to see the advantages we offer, and dvance.

Branch at 50 North Delaware St.

2 GREAT BEANS WILLOW LEAF LIMA.

An ever-bearing variety that matures its deli-cious Beans even in the far North. Wonderfully

cious Beans even in the far North. Wonderfully prolific and ornamental. 1,729 pods from one bean. Many growers North, South, East and West unite in pronounc-makes a vine 15 to 20 feet long, so full of bloom and so loaded with pods throughout the season that it is the wonder of all. It is so robust and thrifty that it will grow and yield abundantly even in the short seasons of the North. It matures its luscious beans **earlier** than any other Lima, and continues to bear abundantly throughout the entire season, making it, in fact, an ever-bearing bean equally as good for market purposes as for family use, and so productive that only a few poles are needed to supply a large family. Think of being able to gather 20 well filled pods of Lima Beans at one grasp; it seems most impossi-Think ble, yet it has been done with this variety. Some customers report that they have tried in

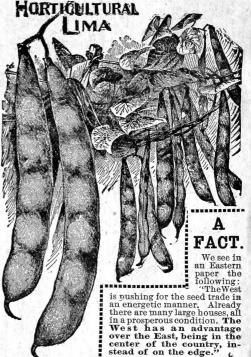

vain to raise Lima Beans before, have had no trouble with the but Willow Leaf, so thrifty do the vines grow, so quickly produce pods, well filled with Lima Beans, which are of the most exquisite flavor. Besides giving an abun-dance of luscious Lima Beans it will be an ornament to your garden, each vine making a tall

h shaft of luxuriant foliage covered with bloom. Pkt. 10c, 3 pkts. 25c, pt. 30c, qt. 50c, by mail, post paid.

HORTICULTURAL POLE LIMA

This is a highly important novelty as it is in every respect entirely distinct and meritorious. It is a cross between the common Lima and Horticultural Beans. Has the shape of the former and color of the latter, while its flavor is a combination of these two finest of all Beans. It is very prolifie, bearing 5 to 7 beans in each pod, and is fully three weeks earlier than any other Lima. This is a most important fact. It can he grown in our Northern States and Canada, where no other Lima will mature. Pkt. 10c, 3 pkts. 25c, pt. 40c, qt 75c, by mail.

adanda ananganan

EVANS' TRIUMPH CELERY.

For solidity, crispness and fine nutty flavor-it is not surpassed. Grows medium size, color creamy white. Besides all the good qualities enumerated, there is one still greater, namely, its keeping qualities. It can be kept late in the spring to April and May. It is also very economical, as every particle can be eaten. For market gardeners, late, use the "Triumph,"-always brings them out triumphant. Pkt. 15c, oz. 75c.

OUGH & READY OR HARD HEADING ABBAGF iar and extraordi-

nary keeping qualities of this cabbage, which reserves the leads until late spring as green as when gathered in the fall, it is pre-eminently the King of Cabbage for late spring selling.

For get up and getting there this new variety occupies the field without a competitor. Season Sure to late. produce large heads of the greatest solidity even under unfavorable

The heads grow medium to large size, but owing to their hardness, it is one of the circumstances. heaviest cabbages grown. Those who have this cabbage for sale in the spring will have the market all to themselves, and remember this is the time the big prices are obtained. Read what a few growers have to say about this cabbage:

MR. R. M. EDGECOMB, Mapleton, Mich.: "I have just (April 15) taken out a wagon load of your Hard Heading almost as green as when buried."

MR. JONAS C. SCHOOB, of Cumberland, Pa.: "I put out fifty plants, and forty-nine made the heaviest heads I ever saw for the size, and all so uniform !"

A market gardener writes: "I have tried all the favor-ite kinds of cabbage, but found no other half so good a keeper, it being in good market condition as late as the 15th of May, which is a fortnight after all other kinds of cabbage have played out. It also differs from all other kinds in making heads as hard as a rock; standing late riosts in the field better than any other sort, it is espe-cially adapted for late autumn, winter and spring sales." Pkt. 10c, oz. 35c, ½ lb. \$1.35, lb. \$4.00.

NEW CLIMBING JAPANESE

This great novelty was introduced from Japan into Europe, where it created a great sensation and was the reign. ing novelty, and met with a phenomenal sale. From Europe it crossed over to this country, where they are also having an enormous sale.

The vines are healthy, vigorous growth, with rich, dark green foliage, and throw out strong, grasping tendrils, which enable it to climb trellis, wire netting, brush, or any other suitable support. It climps so tightly that it is not prostrated by heavy storms of wind or rain. It comes into bearing quickly and continues to set the fruits abundantly throughout the season, while the climbing habit of growth enables the hanging fruit to grow per-fectly straight; of large size, from twelve to sixteen inches in length. The cucumbers are thick, exceedingly tender, and of delicate flavor; of cylindrical shape, flesh pure white, skin dark green turning to brown and netted, when ripe. They are of excellent quality for slicing, and when young make attractive pickles,

With this variety of cucumbers the product of a given area of ground can be increased three-fold, thus making them particularly valuable in small gardens or to grow on high priced land. The vines continue bearfrom Japan. Pkt. 10c, 3 for 25c, oz. 30c.

GRAND NEW MUSK MELON THE COUNTESS.

A VERY distinct new variety and one that will not be equaled by any other new varieties that may be offered in the various catalogues this season. This new Melon "THE COUNT-ESS." leads all up to

date, 1895. A distinctive feature is the slight neck on the stem end, which however is not in the least objectionable. Grow to large size, nearly round, square or blunt at blossom end, measuring about 12 inches in length by 8 inches in diameter and are very uniform in size. Deeply ribbed, heavily

THE COUNTESS netted on the ridges but smooth in the furrows between the ridges. In out-

ward appearance it is strikingly handsome when ripe; the ridges being of a light green and yellow beneath the netting, while between the ridges the color seems like bright, transparent golden sunlight. The flesh is deep, measuring $2\frac{1}{2}$ inches thick on an 8 inch melon. Deep, rich salmon in color, fine grained, sugary and melting; entirely devoid of any strong spicy flavor of-ten found in red fleshed melons, and yet it has a richness and lusciousness of flavor exceedingly palatable.

WE HIGHLY RECOMMEND "THE COUNTESS" AND PREDICT THAT WHER-EVER USED IT WILL GIVE HIGHEST SATISFACTION, AND WHERE PLACED ON SALE IT WILL TAKE THE LEAD. SUPPLY OF SEED IS SMALL AND CAN BE SOLD ONLY IN SMALL LOTS. PKT. 15c, 2 for 25c, OZ. 30c.

New Iceberg Lettuce.

TUCE as surpassingly fine for the home garden and equally valuable for market; its beautiful appearance insures quick sales. Pkt. 10c, oz. 25c, ¹/₄ lb. 75c.

IMPROVED EXTRA EARLY DWARF ERFURT CAULIFLOWER.

IT was our good fortune to meet in 1893 a gentlemen from Denmark, who was attending the World's Horticultural Congress held in connection with the World's Fair, at Chicago, and who has made a great specialty of improving and growing fine strains of cauliflower. We have obtained a supply of his finest strain of the above named variety, which we now offer to our customers. The most critical trade can depend upon this seed giving satisfaction. The grower states as follows:

"My specialty in the seed line is a superior strain of Early Dwarf Erfurt Cauliflower seed, of which I have for a long series of years been working on. I will not expatiate on the excellence of my seed; suffice it to say that the principles I have been persistently and invariably employing enables me to always produce the best quality of this variety. My favorable location on the salt water see coast and the very propitions seasons we enjoy, in connection with my very strict and merciless selection of seed bearing plants of the highest excellence in type and stamina, have put me in a position to furnish a quality of seed surpassing anything it has as yet been my good fortune to send out." J. PENDERSEN, Copenhagen, Demmark.

Price, pkt. 25c, 1/4 oz. 50c, 1 oz. \$2.00, 1/4 lb. \$8.00.

AEW ICEBERG LETTUCE. Quick Growing, Hard, Handsome Heads, Exquisite in Flavor.

There is no handsomer or more solid Cabbage Lettuce in cultivation—it is strikingly beautiful. The large, curly leaves which cover the outside of the solid heads are of a bright, light green, with a very slight reddish tinge at the edges; they have small indents, which are constantly filled with dewdrops. They are thus kept fresh, and show a remarkably crystalline appearance, which well warrants the name of ICEBERG.

The unusual solidity of the heads is insured by the large, white main ribs of the leaves, each of which, curving strongly into the center, acts like a truss, making it impossible for the leaves to open outward and expose the center, which is constantly thoroughly blanched. Whether in the early spring or the hottest days of summer, the quality is perfect. So long-standing and hard are the heads that they seldom shoot up to seed unless cut open with a knife. We confidently recommend the NEW ICEBERG LETnally valuable for market: its beautiful appearance insures

NEW WATER MELONS. EACH ONE A GEM-THE SA GRAND COLLECTION.

VINDIANA SWEET-HEART.

Our newest and greatest specialty in Water Melons. The most valuable Melon offered in years. An allround Melon unsurpassed. Early, large, handsome, heavy, good shipper, long keeper, brightest color, best quality. Vines vigorous, very productive; ripens early and bears long. Fruit large, oval, very heavy mot -

tled or netted like illustration; light and dark green. Rind thin, but very strong, making it a melon unsurpassed for shipping. Flesh melting and sweet. The best keeper. The Indiana Sweet-Heart Melon brings a good price, when others rot for want of purchasers. Pkt. 10c, 3 pkts. 25c, oz. 20c, 1/4 1b. 75c, 1b. \$2.50.

> TELEGRAMS. See below.

COLE'S EARLY WATER MELON

MDIANA SWEE

FILT

As an every-day Melon for the ama-teur and for the bome market unexcelled. Being somewhat brittle, will not do for shipping purposes. It is very early and will mature in every state; very kardy, vigorous and a sure cropper.

It is sweet and delicate in texture of flesh-which is a deep red colorand deneate in texture of nesh-which is a deep red color-the rind is thin and the quality of the fiesh is sustained clear to the rind. Melons of medium size, nearly round in shape, rind green, striped with lighter shades. As this variety com-bines all the desirable qualities of the best melon, it can be highly recommended for home use, and we feel certain that it will become a very popular variety. **Pkt. 10c, 3 pkts. 25c, oz. 20c, ¼ lb. 50c, lb. \$1.50.**

GOLDEN HONEY WATER MELON.

If this Melon had nothing to recommend it except its quality, this of itself would be sufficient to merit a place with every grower. Take all the superlative adjustives in the English language and against them place this Melon for fine Engine indige and you have not over estimated it. Flesh is rich yellow. Its flavor is deliciously sweet and reminds one of the earliest Water Melons. Golden Honey. This is also one of the earliest Water Melons. Grows to a fine large size. Can not be used as a shipper; being too tender. It is a great acquisition. Pkt. 10c, 3 for 25c, oz. 25c. 1/ 1b. 75c.

MAGNIFICENT PEA OF ALL NCE OF WALES

THIS GRAND PEA from Europe is the most popular in the great markets of their great cities. They are grown in immense quantities by the gardeners and always meet with a rapid sale. No person need hesitate about planting them in this country, as we have grown them here for three years. They are fully acclimated and do equally as well here as in their native country. To the producer they recommend themselves on account of their MAGNIFICENT LARGE PODS, GREAT PRODUCTIVENESS, FREE-DOM FROM MILDEW, and the valuable quality of HOLDING THEIR COLOR LONG AFTER BEING PULLED. To the consumer, on account of their OFLICIOUS FLAVOR and THE LARGE AMOUNT OF SHELLED PEAS TO THE POD. Gardeners, whether for house use or market, where they have once used the PRINCE OF WALES PEA demand it again. In season they are medium, height about 2½ feet, seed very large, wrinkled vines hang very full of pods, which as stated, excel all others in yield of shelled peas. We cannot too strongiv uree all who plant peas to give this of shelled peas. We cannot too strongly urge all who plant peas to give this variety a place in their collection, and note its fine qualities. Price, Pkt. 10c, 3 for 25c, pint 30c, qt. 60c. By freight or express, qt. 40c, peck this \$2.00.

IN ONIONS. You can realize \$500 per acre if you start right by sowing our good seed and keep right by reading "THE NEW ONION CULTURE." Price 50c by mail. We will send it free to all who buy \$5.00 worth of ONION SEED.

SEED IUN

of our great is one specialties, and one of our greatest special-ties is the OREGON YELLOW DANVERS or LONG

KEEPER ONION.

This is one of the MOST BEAUTIFUL VARIETIES IN EX-ISTENCE. In shape, is intermediate between the Flat Danvers and Danvers, with Globe very full bottom and top. It is earlier than either variety named. A heavy yielder and THE BEST KEEPER OF ALL. We have kept specimens in our office

from fall until spring, notwithstanding the warm temperature day and night. Of extraordinary value to grow onion sets, on account of its keeping qualities. All the sets we contract for our own use must be grown from this seed. The warm weather has no effect on our sets, while other people complain of difficulty of keeping theirs from growing. Price, pkt. 10c, oz. 20c, ½ lb. 50c, lb. \$1.50, 5 lbs. or more by freight or express, \$1.30 per lb.

ORTIO

Giant Summer Straightneck Squash.

ON page 38 we offer the Giant Summer Crookneck Squash, which is a great improvement in size over the Old Summer Crookneck, but both the Old and New each have one bad fail: they will crook their necks. All growersregretthisfeature, as it spoils the shape, is liable to break off, besides in shipment they do not pack to advantage, the crook alwayscoming just where one overmeck, we have over-

BRARD

neck we have overcome this bad feature; besides the size is large, shape uniform and quality superior to the old variety. We believe in this sort that we place before our customers the best summer bush Squash to be procured anywhere. Pkt. 10c, oz. 20c, $\frac{1}{2}$ lb. 50c, lb. \$1.50.

New Mammoth Hubbard Squash.

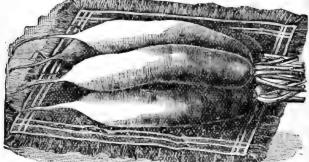

HIS new strain of Hubbard Squash surpasses the old in size, while not losing any of the fine table qualities that have made the original Hubbard the most popular squash ever known in the country. Our aim has been to increase the size as well as to improve the quality in this new strain. Our customers who grow the **MAMMOTH HUBBARD** will see that we have succeeded. The flesh is the most delicate, fine grained and sweetest of all. Can be had in use from September ull May. We look for a large demand for seed, knowing this variety fully merits extensive cultivation. **Pkt. 10c**, oz. **20c**, **/**40.50c, **Jb**, **81**.50

STILL THE ALEVERT & SECOND

Market Gardeners' Ideal Long Scarlet.

THIS is not a new radish, strictly speaking, although many seedsmen would pass it off as such. It is an improved strain of the old reliable Long Scarlet Short Top. It is a week earlier than the old strain, has a shorter and more compact top; remains in good condition longer. In shape is whorter and thicker, which is an advantage if not possible to market at once when pulled. The upper portion is **deep scarlet** red shading off to white at the tips, altogether making a radish of the most beautiful form and color. Pkt. 10c, oz. 20c, 1/4 lb. 50c, lb. \$1.50.

GLASS RADISH.

JUHIS new radish is a fine acquisition. It is long, of light pink color, white tipped and of very uniform size. The flexh is of a transparent white, always crisp and brittle, even if grown to a Jarge size, and mild flavored. It is named "Glass Radish" on account of the fine transparency of the flexh. All who have tried it pronounce it one of the finest among all the radishes. Pkt. 5c, oz. 10c, 14. b. 30c, 15, \$1.00.

"Wisconsin Tree Beans, splendid; Bush Lima, the finest for table I ever saw; Satisfaction Peas splendid for table; Logan's Giant Tomato, I never saw its equal; 12 Jlants raised & bu., some 24 in. In circumference." H. F. STONE, Oakland Co., Mich.

DELICIOUS MEAT.WITH

SEEDS THE BEST EVER PRODUCED.

THE few words above describe this GREAT TOMATO. Others claim wonder-ful properties, offer prizes to induce big reports, but our Logan Giant Seedling comes out victorious every time. If you think you have tried the largest Tomato, try this one now, and you will see that you did not have the largest and best heretofore. It is not only a new variety, but we claim for it in points of productiveness, size of fruit, ex-quisite quality and flavor as well as early ripening, the best Tomato extant. They grow to weigh over 3 pounds each and attain the enormous circumference of 2 feet. This tomato is not like many others, one-third seeds and water. They are a great solid ball of tender deli-cious meat, with very few seeds. They have frequently sold at 15 cents each in competition with other kinds at 35 cents per bushel. If the vines are trained on a support, they will grow 10 feet high and be loaded with the finest fruit you ever placed your eyes on. We advise early orders, as the two past last seasons we were obliged to cut down the size of our Packets to make them go around. We have several times as much seed this year, but we also expect a much greater demand, although during the

seed this year, but we also expect a much greater demand, although during the two last seasons since we introduced it the demand was greater for this Tomato than for anything else that we catalogued.

READ THE FOLLOWING REPORTS: (All letters are on file in our office). "We never saw their equal

"We never saw their equal. for prolific bearing and size. It is a marvelous sight." PENNA. FARMER, "Have eaten the Logan Giant Tomato, and am pleased to say it is the greatest improvement I ever saw in any vegeta-ble. It is the best tomato I ever saw. D. H. CHRISTY, Pa. "The earliest; the largest; the best yielder; the most deli-cious tomato I ever ate." KENNEDY COLE, Pa.

Dies, In is the best connator is ever saw. D. H. OHRIST', Fa.
"The earliest; the largest; the best yielder; the most delicions tomato I ever ate," KENNEDY COLE, Pa.
"Two Giants weighed 38 onness each. They are truly wonderful. The Giant Tomato grew very tall and fruited very large and prolific, hence, imagine my surprise to find them so eoid, sweet and elicious. The finest I ever a e."
"I picked 16 pounds of Giant Tomatoes at one pick-ing from one vine." EAMUEL JOHNSON, Pa.
"I have bought the Logan Giant Tomatoes at \$3.00 per bushel, for sale in my store before other varieties were ripe. Ripened early." H. J. LIEBERMAN, Pa.
"I hought ten new varieties last spring and gave them a fair comparative test. 'Logan Giant' Johnson fraise and quality. I never raised nor seen such fine tomatogave before in my life." J. H. CURTIS, N. Y.

"Mr. Wade, of Blooming Valley, brought to this office a oluster of 8 tomatoes, all on a single stem, weighing 10 bs. They are of the 'Logan Giant' variety. The quality is equal to the quantity." PENNA. FARMER, Pa. "Logan Giant Tomato is the best I ever saw, I sold single

tomatoes for 10 cents each; the product of a single stem for 10 cents. Single plants bore 30 pounds of fruit. Twelve weighed 23% pounds. They ripen with the earliest." D. L. MARSHALL, Mo.

Price, pkt. 20c, 3 pkts. 50c, 8 pkts. \$1.00, 20 pkts. \$2.00.

OUR GROWER WRITES, Nov. 10, 1894. We have had very good success with Logan's Giant Seedling Tomato, and hope to nearly if not quite fill the orders for seed placed with us. We find this variety is one of, if not the largest of all tomatoes, and in productive-ness is excelled by none. It is a very shy seeder, but on ac-count of its great productiveness we have had better success in procuring a crop of seed than we expected. Yours truly, JEROME B. RICE & Co., Cambridge, N. Y.

(9)

On page 9 we offer a real Giant in Tu matoes. The largest of all. While size, combined with ear-liness, productive-ness and high quality, to a great ex-tent fills the bill, yet if we don't attainextreme earliness it lacks in being a complete all-around tomato. As is usual when we attain great size in a vegetable, we sacrifice to a certain extent earliness, hence we must make this up in another variety. which we have done in EVERITTS EARLIEST OF ALL. Extreme earliness is where this variety excels. Outside of this we have equally as good tomatoes as regards color, form and table qualities, but none of them approach Everitt's . Earliest of All in season of ripening, by a week. This is a very important considera-tion, as it allows the market gardener

get the high price early in the season, which oftentimes is the only part of his crop that it pays to market. Everitt's Earliest of All is bright starlet color yery

bright scalible color, very smooth, solid and fine; medium size. The plant grows thrifty and spreading, thus allowing the sun to ripen the fruit evenly and quickly. Every gardenee should plant this tomato. The smail Investment in seed will be many fold returned in the cropif used at home or marketed. Pkt. 10c, oz. 25c, ½ lb. 75c.

o.k. netted gem MUSK MELON.

This particular improved strain of the Netted Gem Melons we have produced by years of careful selection, and their superior quality is attested by numerous large growers in many important trucking sections of the country who regularly procure their seed of us. This variety of melons is largely grown and all planters should use the **O.K.** strain of seed. They are very prolific, small size, weighing 1 to 2 pounds. Flesh thick, green. Flavor lusciously sweet. The shape is almost a perfect globe. Extra early in ripening. They are usually marketed in baskets and crates, and it is the one variety that the markets are seldom overstocked with. We sell hundreds of pounds annually. Pkt. 5c, oz. 10c, ½ 1b. 25c, 1b. 85c.

THIS CATALOGUE REPRESENTS

ENTERPRISE—Any person examining this Catalogue or going through our house will see no lack of enterprise. The edition of our Catalogue is so large that two of the largest printing concerns in this eity are taxed to their utmost to turn them out rapidly enough.

ABILITY—Come and look through our vast establishment and you will see we are able to conduct a large seed business.

CAPITAL—This is the vital part of any business. Money is the Life. We have money to buy right and seeds bought right can be sold right.

FACILITIES—There is not a seed house in the country with better facilities to execute your orders. Besides, we offer the advantage of central location. See 1st Cover Page.

Our great business, which now extends to every part of the world where seeds are planted and plants cultivated, was started by investing 50 cents in a new variety of potatoes. J. A. EVERITT, Seedsman.

PROGRESS IS ONWARD, which is as it should be. When progress is backward, it denotes a bad condition of affairs. Our new potato is "ONWARD" also, and all who plant it, take a great step ONWARD toward making farming a success.

If it was not in our power to produce new varieties of potatoes, they would be in danger of becoming an extinct vegetable. All varieties run out and fail to produce paying crops. Every grower knows this is the case, and any grower who continues cultivating a variety after it has begun to deteriorate, does so at a loss. There is a great need now

for a general purpose potato, one that can be depended upon to produce paying crops under unfavorable season conditions, which so often prevail; one that possesses so much natural vigor that failure is almost impossible. Such a potato we claim to have in our new "ONWARD."

Everett's Onward Potato was produced from hybridized seed in 1890, taken from a seed ball. As soon as it was well developed it showed so many fine qualities that the originator, who is a large potato grower and experimenter (having grown not less than thirty varieties each season for ten years), chose it as his pet potato. It has proven

close it as his pet potato. If has proven a remarkable variety in several respects, and we confidently recommend it as a sort of the highest merit, and we pride ourselves on being expert judges of good potatoes. This potato is on handsome that

they sell at a premium on market, when common varieties go begging. It is a fancy market sort. Tubers grow medium to very large, nicely bunched in the hill, even ifsmall size they are so smooth and handsome as to be marketable. Color, white, slightly netted or dotted on skin, denoting good table quality. Shape long, flattened on sides. They never grow rough and prongy even where others sort out 25 per cent. They are medium in season of ripening, maturing in 100 to 120 days, and keep late in the spring. Flesh white, fine grained. Cook dry and mealy. Their magnificent size, desirable shape, beautiful, smooth, clean appearance and fine cooking qualitiesrecommend them every where, and we predict they will have a great run, as have the debrated Marmoth Pearl, O.K. Marmoth, Prolific, Green Mountain, Early 6-Weeks Market and other

good investment will be used to be a seed of EVERITT'S ONWARD, this the first year of its introduction. There will be big money in introducing them in any neighborhood.

any neighborhood. Price by mail, 1 lb. 50c, 3 lbs. \$1.00, 4 lbs. \$1.25. By freight or express, ½ bu. \$1.00, ½ bu. \$1.75, 1 bu. \$3.00, per bbl, \$7.50.

A GOOD INVESTMENT.

Potatoes of our introduction spring rapidly into popularity, and are bought up at fancy prices in every neighborhood. A few dollars invested in the **ONWARD POTATO** will net big profits.

As will be noticed we give particular attention to Seed Corn this sea

introducing two new kinds and listing four of our great specialties of for-mer years. Owing to the great drought in 1894, good seed corn must be in demand, also the acreage that will be planted to corn will be large owing to the unsatisfectory price realized for wheat. It be-hooves every grower to select the best and most productive varieties, as the seed may make a difference of 10 to 25 bushels per acre on the crop. Each of our varieties have some distinctive features to recommend over the others, yet we can not tell which one would suit particular farms the best. Hence we advise every corn grower to experiment for himself and select from our *select* collection that variety that gives him the best results.

We give the originator's description and recommendation of the New White Cap Yellow Dent Corn and knowing him to be a successful, in fact, expert corn grower, we have no hesitancy in placing before our friends this new sort: "White Cap Yellow Dent is suitable for all climates and soils, and yet grower have over a large set l

yet grows large ears and matures early. The ear grows as large as the Leaming corn and is from 7 to 10 days earlier, and on poor, thin soil will yield thirty per cent. more corn. It will out-yield and out-shell the Leaming.

"It is as natural a yielder as weeds, grows strong, rank and quick, and will produce more corn on poor, thin soils than any kind now in cultivation. After growing different varieties of merit, S. H. Todd, of Huron Co., O., the largest breeder of Chester White hogs in the world, says 'White Cap Yellow Dent beats them all. It is sure to yield me a crop of good, sound corn. It makes more bone and strength than any other corn, and I will grow no other sort.' One hundred farmers in Huron County, expert corn growers, will confirm all that can be said about this corn. Grown growers, will contribute an that can be said about this corn. Grown with over sixty varieties, it out-yielded all other kinds, and with-stood the drought much better. This corn will be appreciated by those living in drouth sections and by those farmers who have poor, thin soil, while on strong, rich soil it has no superior. The tip ends of the grains are white, the inside yellow, making

a beautiful color. There are more fine points combined in this corn than any other in cultivation.

corn than any other in cultivation. Large growers in the great corn belt as well as those out of it. will be pleased with this corn because it is as natural a yielder as weeds. It yields large crops on poor, thin soil. The ears are large, handsome and well filled. It is sure to mature in from 50 to 55 days. It husks easy and shells easy. It commands the highest market price. It will grow more buschels on poor, thin land than any other kind in the world. It stands the drought better than 60 other varieties grown in the come could. It stands the galaxies number of rans on the cohording it. word, It summes the arought better than 60 other varieties growth the same county. If has a large number of rows on the cob, making it a great yielder. It will out-shell and out-yield the Learning corn. It grows its folder strong, rank and quick, from 7 to 8 feel high. It is sure to flease all who give it a trial." Pkt. 10c, Sample Ear 30c, 4 for \$1.00, shelled 1 lb. 30c, 4 lbs. \$1.00, peck 75c, bu. \$2.50.

SECOND CROP SEED POTATOES

Extensive and thorough experiments have demonstrated that second crop potatoes are superior for seed in the north or south to first crop seed. Second crop potatoes are the potatoes grown from seed grown the same season planted late and harvested before

they mature in the tail. The result is small to medium sized potatoes with a great amount of sap and vitality. When planted they start a very vigorous plaut and the vitality stored up in the tuber gives the plant a good start before it need be entirely dependent upon sustenance from the soil. Our sec ond crop potatoes are grown in Tennessee from northern seed planted in the spring. Market gardeners and truckers can re-alize earlier crops and larger crops by planting our second crop seed and the grower who does not will be left by his enterprising neighbor. Much has been published in the agricultural press lately about second crop seed, and all writers who have investigated the matter agree in recommending them. We expect to be able to furnish the following varieties through the season, but as our stock is limited we advise early engagement.

engagement. We regret that we have not more space to devote to this important subject of Second Crop Seed Potatoes. Readers of this catalogue will do well, however, to continue the inves-tigation and give them a thorough trial. **EARLY HARVEST** Tubers average very large – skin slightly indented, shape oval, flattened, flesh while and quality fine. This is an *extremely early variety*, one of the bandsomest and very productive.

Authority like. This is an extremely early tartey, out of the handsomest and very productive. **NEW QUEEN** Whether on poor thin soil or rich bottom well. Very early, extra quality, wonderfully productive, size large, color white, shape long, smooth and clean. A force market variety

size large, color white, shape long, shown and training anaket variety. A well known variety, largely **BEAUTY of HEBRON** A well known variety, largely grown. Our seed is pure and the genuine original Beauty of Hebron. A change of seed will no doubt be beneficial, to say nothing about the advantages

of our Second Crop Seed. PRICE OF EACH VARIETY-Lb. 25c, 4 lbs. 75c, by mail. ¹/₄ bu. 75c, bu. \$2.00, per bbl. \$5.00.

HANDSOME, PRODUCTIVE, SWEET.

The earliest large corn ever introduced, being only a few days later than Cory, with ears nearly as large as the Stowells. Ears were grown ready for table use in **61** days from time of planting, and they weighed 1½ pound each, and were 12½ inches long by $8\frac{1}{2}$ inches around. To help you realize these figures, get the largest ear of field corn you can find and compare measurements. This was grown with special culture. An average size is about 9 inches long. It has a medium size white cob and large pearly white kernels, very sweet, tender and full of mik. This corn has advantages over any other variety extant and combines all the good qualities of a general purpose Sweet Corn. No market gardener can afford to be without it, and every family garden should contain at least a few hills. Pkt. 10c, pt. 25c, qt. 40c, by mail; peck \$1.50.

GOLDEN SEAL FIELD CORN.

IT gives us great pleasure to be able to offer this season for the first time a variety of Early Corn of such great value as the one illustrated below and which we are pleased to name "Golden Seal."

Which we have please to have obtain some familiar with the extra early variety called "Pride of the North." In comparison with that variety the **Golden Seal** grows a slightly larger ear than the true Pride of the North and is from 10 to 15 days earlier, maturing in about 80 days; a heavy yielder, considering its *extreme* earliness and a beautiful corn both in ear and shelled, being a rich golden yellow. This corn is suitable for any section where corn is grown in the United States. Being the earliest variety it recommends itself to growers North while for farther South it will produce a sure crop on poor thin soil or on rich soil, even in a dry season, while for replanting or late planting is just what you want. Our crop this season was grown without rain from planting to harvesting except a shower that fell immediately after planting and beat the ground down, doing more harm than good, yet notwithstanding the unfavorable sea-

son the yield was over 70 bushels per acre. Stalk grows 7 to 9 feet high, making its growth quickly. Ears set 3 to 4 feet from the ground and generally two ears and sometimes three to each stalk; cars 8 inches long, grain deep; cob small, color of cob red. Out-yields Pride of the North 25 to 30 bushels per acre and in a dry season, such as we have had in Indiana for two years, **Golden Seal** out-yields every other kind of whatever description on high ground or poor thin soil. Every farmer should procure seed of this new sort as he will need it, if in the North for general crop. If South, to plant for early feeding or for late crops (as late as July 4th), or for replanting.

2 BEAUTIFUL CLIMBERS. THE BEAUTIFUL, FRAGRANT CINNAMON VINE.

A beautiful and rapid climber, possessing the rare quality of emitting from its flowers the delightful odor of climamon, and very appropriately called the "Cinnamon Vine." The plants are grown from bubs or roots, and are very nice for window ornaments or outdoor culture. They are perfectly hardy, the stem dying down every autumn, but growing again in the spring so rapidly as to completely cover any trellis or arbor very early in the season. The vines often run 25 feet or more, and when trained over and about a door or window make an ornament much admired, while its many clusters of delicate white flowers send out an amount of fragrance that is truly wonderful. It is easy to culture; has no insect enemies, and is no: affected by drought, because it roots so deeply. The tubers are called "Chinese Yams" (the botanical name being *Dioscorea Batuals*); they increase in size from year to year; are often two feet long at two or three years of age, and run straight down in deep soil. Flesh whiter than superfine flour and equally as good for table use as the very

TURAL SIZE

use as the very best potatoes. We have sold these bulbs for several years, and the plant has ever increased in popularity. We have always charged 25 cts. for 3 bulbs, but this year we are prepared to offer 1 doz. large bulbs, finer than we ever had before, in a neat box, by mail, post paid, for 30c, 2 boxes for 50c, 5 for \$1.

New Yellow Dolichos.

This luxuriantly flowering vine is a most welcome addition to the list of annual climbers, and as a late, beautiful and prolific bloomer should have a place in every flower garden, or wherever bare walls or unsightly objects are to be hidden from the eye.

It blooms later in the season than other varieties, being at its best when earlier climbers are brown and dead.

Erect racemes of bright yellow blooms, similar in shape to half-opened pea blossoms, form at every joint, and the leaves and stems are covered with downy, grayish hairs, producing a most novel effect. The outer surface of the petals is rich brown, interior space or standards soft, glowing canary yellow. The blossoms are succeeded by slender, rounded pods, which lend additional beauty to the vines, and are far more effective than the broad, coarse pods found in other varieties. The denser foliage of this *new Dolichos* stands out in striking contrast to others, covering the poles with a heavy mass of vines when most other varieties were half way up the poles. **Pirt. 10c, 3 for 25c, oz. 4oc.**

SPECIAL. For 35c we will send by mail postpaid, 1 dozen large bulbs of Cinnamon Vines and 1 pkt. New Yellow Dolichos.

CHO

NEW SWEET PEA. N BEL

T introduced last year. We now have thi riety so that it comes quite true from seed, which. unfortunately, was not the case last season. shows an important departure from the colorings and markings of all other varieties—being neither striped nor mottled, but distinctly spotted. The standard is clear, bright rose of uniform coloring; wings of crystal-white with bright purplish-car-mine spots. The flowers are very large, of good substance, and finely formed, while the standard does not have that tendency to droop so common in other large-flowered varieties. Of such good substance are the flowers that they remain per-fect and keep well in a bouquet for a long time, thus rendering this variety most desirable for cut flowers. Pkt. 10c, 3 pkts. 25c, oz. 40c. shows an important departure from the colorings

SOME NEW MACHINES. GREAT MACHINES,

Which abolish much of the drudgery of cultivating the soil, making slow, laborious, disagreeable labor rapid, easy and pleasant.

MAN-POWER WORK IS DONE ALMOST WITHOUT WORK.

EVERITT'S MAN-WEIGHT

PLOW, HOE, CULTIVATOR, DRILL, ETC. SINGLE AND DOUBLE WHEEL AND COMBINED. Patented in the United States, Canada, Great Britain, France, Germany, Austria and Belgium.

Will revolutionize Hand Power Cultivation and makes keeping a horse an unnecessary expense in many cases.

in many cases. MODERN scientists and inventors are devoting their waske. There are fewer new things "under the sun" than many people imagine, but the manners of utilizing them are what causes us to hold up our hands in astonishment. Steam is as old as the earth, yet the steam engine which utilizes what was wasted for thousands of years is of very modern construction. Who will doubt the existence of electricity since the foundations of the world were laid? It remained for our Franklin to lay the foundation of its usefulness, and Edison and others to utilize it for the great benefits of mankind. The wind which cooled the brows of Adam and Eve in Paradise, and has ever been present, restless and unchained, has been harnessed and now does the will of man. There is sufficient force unconsciously going to

waste in our cities and towns every day to drive every manufactory needing power. Every man, woman and child, whether in city or country, is continually exerting a force equal to the weight of the body, whether lying down, sitting, standing or walking. This force, equal to millions of pounds, has been going to waste in all time past, and from the condition of things, must continue to be wasted, to a great extent, for all time to come. But why not utilize it to as great an extent as possible? If this force, which every person must exert, can be utilized by the agricultural classes to the saving of muscular cxertion, will it not be a great boon? And will not he who perfects an appliance that allows the man, as he walks across his fields, to take part of his weight (force) off of the ground and use it for planting or cultivating his crops, to the saving of muscular czertion, be a public benefactor? We are now ready to call attention to **Everitt's Celebrated Man-Weight Farm and Garden Tools.**

EVERITT'S CELEBRATED MAN-WEIGHT FARM and GARDEN TOOLS.

THESE creat machines were invented and patented by J. A. EVERIT, in 1891, and greatly improved for 1895. The great advantage of this invention can be parily understood by studying the illustrations on last cover page, but no person can *fully realize* their grand advantage, until he uses the machines. They are a great boon to all cultivators of the soil, and must be classed with the great inventions of the age, yet they are so simple that the natural question with every one is: "Why did I not think of that?" So nicely do they fill a want existing with thousands of gardeners, nurserymen, seedsmen, florists and farmers, that after the first trial they invariably conclude to "never do without them." The Man-Weight Cultivators are worth their weight in silver, if not in gold, to any one who cultivates the soil. All who have used the machines unanimously endorse them in the strongest language. We have heard sensible, shrewd gardeners remark: "I would not sell them for \$25." "\$100 would not tempt me to do without them one season," etc. They are the only machines we know of that suggests sufficient merit and practical utility at first sight to sell without a trial. The first gardener who saw the first one we could make. Other gardeners at once acknowledged that it is just what they want, and

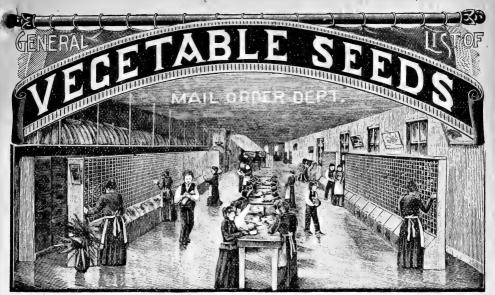

many remarked that "If all gardeners knew of these machines they could not be made fast enough to supply the demand." A trial by any person will demonstrate the wonderful utility of these machines. Any person possessing them will make it impossible for his neighbors to compete with him in raising crops. There are several features on the Man-Weight Tools

There are several features on the **Man-Weight Tools** which are novel and make a tool vastly superior to any other hand power or horse machines:

1. We mention the push bar. In operation, the body is inclined forward, thus taking part of the weight of the body off of the ground and directing it against the machine. In this way the machine is propelled by the weight of the body, without any muscular exertion whatever. To those who object to using this machine, because, as some have said, "We won't be a horse," we will say to push this machine across the field is no harder than to walk across empty handed. Your weight does the work. Without this machine all your weight is wasted on the ground.

2. By means of the push-bar we propel and guide the machine, hence the drag-bar can be hinged, and are *adjustable* in all directions; thus the tools attached to the drag-bars perform the work just as a weeder would in your hands. It is the only cultivator made that

(Continued on page 64 and last Cover).

"NOT SKIM MILK is what we deal in, and the following list will be found to CREA contain the CREAM of the Varieties. Hence, if we don't catalogue as many varieties as some other seedsmen, you can still get the CREAM or the BEST, from us, and the best is not too good for our customers. O.K. BEANS BUSH OR DWARF.

We pay postage on Beans offered by Pkt, Pint and Quart. Larger quantities are sent by freight or express at expense of purchaser.

WHITE WONDER FIELD—A very early field bean that can be planted on ground where other crops have been removed. It greatly outyields the Navy, on same ground and under same conditions. Seed is about the size of Navies and can be marketed as such, although the cooking qualities are superior. Pods large and closely filled. They are wonderfully productive, having yielded at the rate of 500 bus. per acre. Our trade in this Bean is very large. We recommend them highly. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.75.

WISCONSIN TREE—Introduced by us in 1893, and we claim it is the best field bean in the country. Our customers who have grown them bear us out in this assertion. It is quite distinct from the Mexican or California Tree Bean. The beans being twice as large, are far more productive and very early. Grows to height of 18 to 20 inches. The beans are very white, of finest flavor and cook in much fess time than the Navies. Parties who have been growing the old Tree Bean will find the Wisconsin a great improvement in all respects. We advise all who put out a crop of field beans to plant of the White Wonder and Wisconsin Tree Be.m. and they will be convinced of their superiority. Pht. 3c, pt. 25c, qt. 40c, peck, 81.23.

Golden Wax-A standard sort; very early; pods brittle, long, entir-ly stringless and of a rich golden-wax color, of dwarf, compact habit, productive. Pkt. 5c, pt. 2. c, qt. 50c. peck §1.50, bu. §5.73.

New Extra Early Refugee-This is a selection from the well known Refugee, and will be ready for market ten days earlier, or about the time the ordinary Refugee is in flower; is an immense yielder and anre to produce a crop in either wet or dry season. Best for pickling. Pkt. 5c, pt. 25c, qt. 40c. peck 81.25, bu. \$4.50. Early Mohawk-Van

Early Mohawk-Very hardy, early and productive; an old sort, green pods. Pkt.5c, pt. 20c, qt. 35c, peck \$1, bu. \$4.00.

CHALLENGE BLACK WAX-In farliness and uniformity of ripening this Wax Bean excels all others. All the plants will give a full extra early plant, as in other kinds. This habit is of inestimable value to market gardeners, and we will say that where known, the Challenge Black Wax is held in the highest esteem. Plants are very vigorous and more upright than the old German Wax, which should be discarded on account of the great superiority of this. Pods are large, of good color. Stringless and of superior flavor. Pkt. See, pt. 25e, qt 40c. peet, 61-50.

ED E/

YELLOW

Griswold's Everbearing Wax - A grand new variety unexcelled in quality, unapproached in productiveness, as they begin to bear early and produce their magnificent pods throughout the entire season. Pods are entirely stringless, rich, buttery flavor. Pkt. Se, pt. 25c, qt. 45c, peek 81.75.

pulp and absolutely stringless, cooking tender and delicious. Of a rich golden yellow, a vigorous grower, covering the ground with its heavy foliage in such a manner as to shade the earth and keep it moist; enormously productive. **Pkt. 10e**, **pt. 30e**, **qt. 50e**, **by mail.**

peck 81.73. **White Marrow fat**-A standard field variety for cooking dry. Largely grown. Quoted in all markets. **Pkt. 5c**, pt. of the snew variety average 10 to 14 ins., are nearly all solid 20c, qt. 35c, peck 81.00, bu. 84.00.

THE BUSH LIMAS Plant all 4. One Packet of Each 30c.

BURPEE'S (No. 1)—This is the true large Lima in bush form, and comes true from seed. The plant grows 18 to 20 inches high. Stout and erect, branching so much that each bush is circular and 2 to 3 feet in diameter. The leaves are large and of great substance. It is an immense yielder; each bush bearing 50 to 200 large pods filled with the large beans equaling in size and luscious flavor the large Pole Lima. **Pkt. 10c, pt. 30c, qt. 50c.**

DREER'S (No. 2)—All who are acquainted with the delicious flavor of Dreer's Pole Lima will want to grow this bush variety, which is its equal in all respects and has the advantages of bush form. We recommend them highly. Pkt. 10c, pt. 25c, qt. 45c.

HENDERSON'S (No. 3)—This was the first Bush Lima Bean offered, and a few years ago it took the country by storm. It is a very early variety and enormously productive. While the beans are not so large as Burpee's and Dreer's, yet this variety is more of a rough and ready sort and merits general cultivation. It is largely grown as a field crop for dry beans, being a reliable and heavy vielder. A light so for dry

beans, being a reliable and heavy yielder. A light soil, inclining to sand, suits them best. Pkt. 10c, pt. 25c, qt. 40c, peck \$1.75, bu. \$6.50.

JACKSON WONDER (No. 4)—This is the latest Bush Lima to appear on the market and in some respects is quite novel and distinct from the others. Bushes grow from 20 to 30 inches tall. When the pods are young, they may be used as snap beans, when dry as limas, They are very productive; bearing until frost comes, and drought does not greatly affect them. When cooked they are rich, marrowy and fine flavored. Pkt. 5c. pt. 25c. qt. 40c.

> LIMA BEANS can now be grown with so little trouble that every family should have an abundance.

SHOWING HABIT OF GROWTH OF BUSH LIMA BEANS.

BEANS POLE OF RUNNING

LAZY WIVES—No good wife would like to be called a "lazy wife," yet she will be excused for exhibiting a lazy spell when "bean picking" time comes, if she has the foresight to plant this variety. They are called lazy wives because they hang so full and the pods are so long and broad that a mess is soon picked. The pods are wonderfully broad, thick, fleshy and entirely stringless, retaining all their good qualities until nearly ripe. The peculiar taste and agreeable flavor of this bean are so capitating that other varieties are not desired while the Lazy Wives can be obtained. Fkt. 10c, 3 for 25c, ½ pt. 20c, pt. 30c, qt. 50c.

GOLDEN ANDALUSIAN—The postaned. FRt. 10c, **3 for 25c**, 1/5 pt. 20c, pt. 30c, qt. 50c. **GOLDEN** ANDALUSIAN—The pods are 6 to 8 ins. long, thick, fleshy and stringless. It is very common to pick 1/2 bu. from a single vine at one picking; begin bearing when quite young and continue till frost. The bears are pure white and are a fine winter shell bean. **Pkt. 10c. pt. 30c. qt. 50c.**

Part, 10c, pt. 30c, qt. 50c. **EARLY GOLDEN CLUSTER WAX**—It grows rapidly, bearing very early, clusters of three to six pods of rich golden color. Pods average about 8 in. in length, tender and entirely stringless, retaining their plumpness and tenderness long after they have attained a large size, and continue to bear, if the pods are picked, until freet **Ptt. 10c.** nt. 30c. ot. 50c.

 size, and continue to bear, if the pools are picked, until frost. Pitt. 10c, pt. 30c, qt. 50c.
 WHITE CREASE BACK—For string beans it is simply perfection. Its handsome, green pods grow from 5 to 6 in. long, perfectly round, with a crease in the back. They ripen early and bear continuously all summer, the vines being loaded from one end to the other. Pkt. 10c, pt. 25c, qt. 40c, ¼ bu. \$1.75.

We will send 1 pkt. each of the 4 fine varieties named above for

KENTUCKY WONDER—A very prolific sort, grows vigorously, and climbs well, pods grow in large

clusters, green, 9 to 10 in. long, nearly round; crisp and tender. Sure to give great satisfaction; excellent to grow in corn. Seed long, oral, brown color. We sell more of this variety of Pole Beans than of any other to our city customers. This hint may be of advantage to parties undecided what to purchase. **Pkt. 10c, pt. 30c, qt. 50c, peck, %2.50.**

SCHOOL ST

Horticultural—A round speckled bean, used both in the pods and shelled. Pkt. Sc, pt. 25c, qt. 50c, peck \$2.00.

Early White Dutch Case Knife-One of the earliest of all. Suitable for corn or poles, flat pols, well filled with fine, large beans. Excellent for winter use. Pkt. 5c, pt. 25c, qt. 40c, peck \$2.00.

Red Speckled Cut Short-An excellent variety and peculiarly valuable for planting among corn. Vines medium; pods short, round, tender and succulent. Good green or dry. A wonderful yielder. Pkt. 5c, pt. 25c, qt. 40c, peck \$2.00.

POLE LIMA BEANS.

Dreer's Improved—An improvement in quality on the Large Lima. They are plumper and richer; remain green longer. Pkt. 10c, pt. 30, qt. 50c, peck \$2.25.

Large White—This well known and delicious bean is everywhere esteemed. Very large. Pkt. 10c, pt. 30c, qt. 50c, peck \$2.25.

King of the Garden-A magnificent variety in growth of vine and number and size of pods. Specimens have been grown over nine inches in length, and containing seven great large beans. Pkt. 10c, pt. 30c, qt. 50c, peck \$2.25.

Challenge-Have been constantly improved by saving beans from the strongest vines and best filled pods. They yield an amazing quantity of shelled beans. Pkt. 10c, pt. 30c, qt. 50c, ¼ bu. \$2.25.

ALL HEADEL

BRILL'S NONE-SUCH

0003-000

This new, distinct and valuable variety of Cabbage can be sown in the fall and will not run to seed like most second early sorts, when wintered over. This fact will make it a favorite in the south and with porthern growers who still use cold frames. Tt is really an "All Seasons" variety. Sown in the fall or in early hot-beds it will head immediately after the Wakefield, and may be sown at intervals until July 1st to 10th when the sowing for winter use should be made. The originator, who is the largest grower of cabbage seed on Long Is-land, says: "The 'None-Such' is unquestionably the best Cabbage for general purposes ever intro duced. Succeeds admirably as a second early, aummer, fall or winter variety in every section of the United States and Canada, Long Island gardeners and others who saw this Cabbage growing willingly paid \$10.00 per pound for the seed." We hope every one of our customers will include in their orders

a package of this fine cabbage. P **25**c, oz. 30c, $\frac{1}{4}$ lb. **8**1.00, 1 lb. **8**3.50. Pkt. 10c, 3 for

CORN SALAD-Pkt. 5c, oz. 10c, 1/4 lb. 20c, 10. 85c.

ENDIVE

Green Curled-Not only most useful as a salad, bus it is highly ornamental from its delicately cut and colored leaves. It is much used for garnishing. (See cut). Pkt. 5c, oz. 15c, 1/4 lb. 50c.

Broad Leaved Batavia-Chiefly used for flavoring. Price the same as above.

KOHL RABI-Early White Vienna-Very early, small, handsome, white bulbs. Pkt. 5c, oz. 15c, 4 lb 40c, lb. \$1.50.

Early Purple Vienna-Identical with former, except in color. Pkt. 5c. oz. 15c, 1/4 lb. 45c, lb. \$1.50. -----.................

FACTS FARMERS and Gardeners have so often been disappointed in seeds, potatoes and grain, from which they expected great things, and with good reason, that they hesitate to invest in anything new, and often allow a really valuable article to pass. A well-established house can not afford to trifle with their customers in this way, and the best guarantee of our course in the future is our record in the past. Before we offer a new article we go to the trouble to ascertain that is strictly O. K., and we point with pride to the many choice varieties of vegetables, grain, potatoes, etc., of our introduction that are now in general cultivation.

GIANT PERA—A variety remarkable for its great size, often attaining a length of 18 inches and 10 inches in circumference. Notwithstanding this immense size, their quality is excellent. They are fit to eat at all stages of their growth, even when full gr ow wn, and are free ef rom the green cucumbear taste. Pkt. 10c, 3 pkts. for 25c, oz. 20c, ½ lb. 50c, ib. \$1.50.

ALL GHE FINEST

IANT PER

GHERKINS

Gherkins—Very small and prickly fruit, used expressly for pickling. Pkt. 5c, oz. 20c.

PARISIAN PROLIFIC PICK-LING-This new French sort is a great acquisition. The fruit is very long, slender, cylindrical, densely covered with fine prickles, and deep, rich green in color. The flesh is very crisp and tender, making it one of the best for slicing, as well as for pickles. Enormously productive. Pkt. 10c, oz. 20c, ¾ lb. 65c.

NICHOLS' MEDIUM GREEN— Very thick through, full at both ends, handsome in appearance, and of fine quality. The vines are vigorous in growth, and very productive.

WESTERFIELD'S CHICAGO PICKLING—Very popular with Chicago market gardeners, and extensively grown in that vicinity. Fruit, meinm length, pointed at each end, with very large and prominent spines; color, deep green.

GREEN PROLIFIC OR BOS-TON PICKLING—A very prolific variety of fine qualities. With good culture 200,000 can be raised on an acre.

ERBEARING

EVERGREEN—One of the handsom est and most valuable. The fruit remain a long time in prime condition. It is alan everbearing sort and wonderfully pro life.

IMPROVED EARLY WHITE SPINE—Vines vigorous, fruiting early and abundantly; fruit straight and handsome, light green with a few white spines.

EARLY FRAME—A standard early sort for the table and pickles. Vigorous growth and productive.

EARLY GREEN CLUSTER—A short, prickly variety, bearing in clusters near the root. It is a great bearer and matures early,

IMPROVED LONG GREEN—Forms fruit for the table nearly as early as the shorter sort, about 12 inches long, firm and crisp; with very few seeds. The young truit makes one of the best of pickles.

ARLINGTON W H ITE SPINE— The young fruits are unusually crisp and tender, and are of a very dark green color, so that the variety is considered by many to be the best for small pickles.

Snake—This cucumber grows sometimes to the length of six feet, curled up like a snake. Pkt. 10c.

NEW EVERBEARING-Of small size, very early, enormously productive and vauable as a green pickler. Vines exhibit at the same time oucumbers in every slage of growth, the small ones being perfect in shape, of a fine green color and just the size for pickling. O. K. PERFECT PICKLING

O. K. PÉRFECT PICKLING —Certainly one of the finest pickling cucumbers in the market. Early and a great bearer, well formed, firm and crisp. Early Russian—The earliest

of all ; small size.

A DOZEN FINE VA-RIETIES OF , LETTUCE.

TENNIS BALL—A fine early sort; very hardy. One of the best for forcing under glass or early planting outdoor. Heads are small, but extremely solid. Pkt. 4c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

EVERLASTING—Every gardener knows the importance of having a lettuce that is slow to run to seed. **This sort excels all others in this** respect. It will remain almost all summer in prime condition. It is early and remarkable for the size of its head. Particularly do we urge market gardeners to grow it, and it will put money in their purses, as no variety will bring more money nor produce a more permanent crop. **Pk.10c**, 3 pkts. 25c, oz. 20c, % ID, 75c, ID. \$2.50.

New York—Heads almost as solid as an early summer cabbage, which in general form it somewhat resembles. It blanches itself naturally, tender and of excellent flavor, and entirely free from bitterness. Pkt. 4c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

IMPROVED HANSON-The finest strain of this popular variety in the country is what we offer. Our seed will produce mammoth heads almost as solid as cabbage, delicious, sweet, crisp and tender. Stands drought and scorching heat better than many others. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. \$1.00.

BLACK SEEDED SIMPSON-Grows fully double the size of the Early Curled Simpson, and is better in every way. It is much lighter colored, leaves being almost white. Stands summer heat splendidly. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.50.

CALIFORNIA ALL-HEART-Its handsome shape and appearance are well shown in the engraving. It heads up like a cabbage and almost as solid, of a beautiful light green shade, almost white, and a very rich flavor. grows rapidly and is tender and sweet at all times. Pit. 5c. oz. 200; ½ 10.75c.

TILTON'S WHITE STAR (SEED WHITE)—Of the Black Seeded Simpson type, but grows larger and more rapidly; blanches perfectly and is of excellent quality. The plants remain long in condition for use before running to seed, and owing to the thick leaf keep long after cutting without wilting. For forcing and early planting out doors, this is a decided improvement over other varieties of this class for either purpose. Pkt. 10c, oz. 20ce, ½ 1b. 50c, lb. \$1.50.

GRAND RAPIDS—This variety originated at Grand Rapids, Mich., where it is largely grown for shipment and where it is considered the best loose headed lettuce for forcing underglass. Leaves medium size,

of light, yellowish green color, much crimped, and frilled, thin, but of very upright growth; forms a fair sized but loose head; crisp, tender and of good quality. Will stand without spoiling a week to ten days after it is fit to cut. Pkt. 5c, oz. 15c, ½ lb. 40c, lb. \$1.50.

BUTTERCUP—For beauty of foliage, extreme tenderness and delicacy of flavor, it is hard to beat. Always forms good solid heads. It is one of the best of all the new varieties. Pkt. 5c, oz. 15c, ¼ lb. 35c, lb. \$1.25.

DENVER MARKET—An early variety of Head Lettuce, either for forcing or open ground. It forms large, solid heads of a light green color, and is very slow to go to seed. The leaves are crisp and tender, and of excellent flavor. By these blistered leaves it distinguishes itself from any other kind of lettuce now grown. Pkt. 5c, oz. 15c, ½ lb. 40c, lb, \$1.50.

CALIFORNIA CREAM BUT-TER-A distinct variety of cabbage lettuce. It forms round, solid heads, as shown in the illustration. The leaves are of a very rich cream-yellow color-most refreshing in appearance, and particularly rich and buttery to the taste. The heads are of good size, compact, very hard and solid. The heads are so solid that generally they have to be cut before any seed stock can make its appearance. Pkt. 5c, oz. 15c, ¼ 1b. 50c, 1b. \$1.50. TOMHANNOCK-Entirely dis-

TOMHANNOCK-Entirely distinct from all other existing varieties, and of superlative fine quality. It forms a beautiful plant ten to twelve inches high, grows very quickly, is ready to cut early; remains for weeks of the finest quality. Pkt. 4c, oz. 10c, ²(b), 30c, ib, Si.00.

K. Starting and St

The Deacon-Forms large and very solid heads, of attractive green color, very crisp, tender and of first-rate quality. Pkt. 5c, oz. 15c, ¼ 1b. 35c, 1b. \$1.25.

"All Summer Lettuce"—One dozen varieties mixed. Will give you excellent lettuce all summer from one sowing. Try a packet this season. Large pkt. 10c, oz. 20c, ½ lb. 50c.

We don't do half the seed business of the country as a little concern near here claims they do, but we do ten times as much business as any other seed house in this city.

flesh. The finest exhibition melon. Pkt. 10c, oz. 20, 1/4 lb. 35c, lb. \$1.25.

DELMONICO—The shape and appearance of this new melon is well depicted in the illustration. The fiesh is of a beautiful orange pink, and for quality is among the very best. **Pkt. 5c**, oz. 10c, ¹/₄ lb. 20c, lb. 75c.

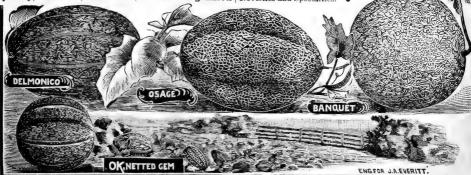

CHRISTOPHER COLUMBUS-An absolutely distinct variety. The large size and peculiar external appearance so remarkably distinct from any other sort, in connection with its extraordinary fine certification of the sector of the in connection with its extraordinary fine eating quality, which excels all others, and its fine grained

and thick flesh proclaims it a popular favorite w_erever introduced. Flesh green. Size conveni-ent for market. Medium early. A splendid shipper. Pkt. 10c, oz. 20c, ½ 1b. 50c, 1b. §1.25.

OSAGE-Extensively grown for hotel trade-Medium size, is egg-shaped. The sk n is very thin, dark green color, slightly netted; flesh salmondark green color, slightly netted; flesh salmon-color, remarkably sweet and spicy. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

BANQUET—Of medium size, flat at both ends-In quality has no superior. The flesh is uniformly deep and of that granulated character that always indicates a good melon; color, a dark rich salmon. Pkt. 5c, oz. 15c, ¼ lb. 30c.

O.K. NETTED GEM-See Novelties and Specialties

Bay View-With ordinary culture the Bay View will grow to weigh from 10 to 15 lbs., while with extra cultivation it will weigh from 17 to 20 lbs., with a length from 16 to 18 inches. Light green, flesh very thick buscients and sweat "Pitt de or. 100 k k h luscious and sweet. Pkt. 4c, oz. 10c, 1/4 lb. thick 20c, ib. 75c.

Cassaba-Very large, oblong, netted skin, excellent flavor. Pkt. 4c, oz. 10c, ½ lb. 20c, lb. 60c.

Acme, or Baltimore-A very productive, oblong musk melon, that is quite popular in the Baltimore market. The fruit resembles the Bay View, but are more pointed at the ends. Of large size, ribbed, and heavily netted. A good shipper. Flesh quite thick, light green and of good quality. Pkt. 4c, oz. 10c, ¹/₄ lb. 20c, lb. 75c.

Jenny Lind-Small size, but of best quality; season early. Pkt. 4c, oz. 8c, 1/4 lb. 20c, lb. 65c.

Prolific Nutmeg-Large growth, fine form, skin and flesh green; very delicious. Pkt. 4c, oz, 10c, ¹/₄ lb. 20c, lb. 75c.

Christiana--One of the most delicious and quickest growing of all melons, only adapted, however, to the family garden, as it must be eaten just as it falls from the vine of its own accord. Pkt. 4c, oz. 10e, ¹/₄ lb, 20c, lb. 75c.

EMERALD GEM—About the size of O.K. Netted Gem but the skin is smooth and of a deep green color. Flesh salmon, very thick, quality superb, vines hardy and thrifty, yielding heavy crops. Pkt. 5c, oz. 10c, ¼ Ib. 20c, Ib. 75c.

KOHL RABI.

Early White Vienna-Very early, small, handsome, white bulbs. Pkt. 5c, oz. 15c, 1/4 lb. 40c, lb. \$1.25. Early Purple Vienna-Identical with former, except in color. Pkt. 5c, oz. 15c, 1/4 lb. 45e, lb. \$1.50.

LEEK.

Large London-A large strong plant, with broad leaves. Pkt. 5c, oz. 15c, ¹/₄ lb. 40c, lb. \$1.25.

MUSTARD.

Black or Brown-Pkt. 5c, oz. 10c, 1b. 45c. White-Best for salad or culinary purposes. Pkt. 5c, 1/4 1b. 15c, 1b. 45c.

NEW CHINESE—Highly esteemed for salads, par-ticularly in the south. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 85c.

NASTURTIUM.

Culture-Sow after the ground is warm, in drills one inch deep, by the side of the fence, trellis, or some other support, to climb upon. They will thrive in good ground in almost any situation, but are more productive in a light soil.

TALL MIXED-Both ornamental and useful. Its beautiful orange col-ored flowers serve as a garnish for dishes, and the young leaves are ex-cellent for salads. The flower buds, scarcely formed, and the green seed pods preserved in vinegar, make a pickle greatly esteemed. Pict. 5c. or. pickle greatly esteemed. Pkt. 5c, oz. 20c.

GIANT VESUVIUS ONION.

This new Giant Italian Onion is one of the most beautiful of the many fine sorts from that country. The bulbs are of a handsome globe-shape, and grow to weigh 2 to 3 lbs. each the first year from seed. Skin red; flesh white; flavor mild and sweet. A great novelty that our friends should not fail to plant. Pkt. 10c, 3 for 25c, oz. 25c, 16. 75c, 1b. \$2.50.

MUSK MELONS (Continued.) WATER MELON See Additional Vari-eties next page.

Gypsy, or Georgia Rattlesnake-A superior early market variety; large, oblong; skin green mottled and striped. Pkt. 4c, oz. 10c, ³/₄ lb. 25c, lb. 75c.

Black Spanish-Medium size, round, color very dark green, flesh scarlet, seeds black, flavor rich and sugary. Pkt. 4c, oz. 10c, 1/4 lb. 20c, lb. 75e.

Cuban Queen-Flesh bright red, luscious, erisp and sugary. An excellent keeper, and bears transit to dis Sugary. All executions report, and count of an experi-ance, thin rind, red flesh and delicions taste are capti-varing. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 65c, 2 lbs. or more by express at 65c per lb.

Mammoth Iron Clad-One of the largest varieties known. With ordinary callivation many mclons weigh 60 to 70 lbs. each. They have frequently been dropped 3 feet and even from the shoulder of a man without bursting or showing any braise. They keep in fine condition for one month after being ripe. The heart is very large. Pkt. 5c, oz. 10c, 1/2 lb. 25c, lb. 75c, 2 lbs. or more by express at 65c.

Vick's Early-This melon is highly prized for its extra earliness. Oblong in shape, smooth, size me-dium, flesh bright pink, solid and sweet. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 85c.

Early California-Very large size, light green color, thin but tough rind, an excellent market variety, al-most equal to lee Cream; fine flavor. Pkt. 5e, oz. 10c, 1/4 lb. 20c, lb. 75c.

Light Icing-Fruit medium size, round, very light green or white, mottled with slightly darker green. Flesh bright, light red, very sweet and tender. By many this is considered the best of all melons. Pkt. 5c, oz. 10c, ¹/₄ lb. 25c, lb. 85.

INDIANA SWEETHEART WATER MELON-The most valuable variety of all. Don't fail to in-clude it on your order. See Novelties and Specialties.

a very small neck, perfect globe shape. On market they always attract attention, and bring two or three times the price of ordinary onions of any other color. They are wonder-fully productive and can be grown by any person.

"Orchard and Garden" ays: "The finest we have ever raised. The acme says: of beauty and perfection, and undoubtedly will become the most popular yellow Onion in cultiva-tion."

"Popular Gardening" says : "Among the score or more of fine sorts of onions none can hold a candle to Prize-Taker. Our specimens were the finest onions we ever raised. The smallest bulbs weighed over a half pound each, and the yield was at the rate of over 1,000 bushels per acre. No other variety can successively compete with the Prize-Taker."

600/TO 800 BU. PER ACRE AN ORDINARY CROP FROM OUR SEED

YELLOW CLOBE DANVERS.

This magnificent sort can not be too highly recom-This influence of the second s spring. We offer but one variety of Dance, a constraint that is the bod. For reliability in bottoming our strain is unsurpassed. Bulbs are very handsome, round, of this straw-colored skin: flesh white, 18 unsurpassed. Bills are very handsome, round, of good size, with thin, straw-colored skin; flesh white, fine grained, firm, mild and excellent quality. It ripens early, keeps well and sells readily at the highest price. Our Yellow Globe Danvers is all that can be desired as a market and table Onion. We sell seed in 100 lb lots to readividuel groupers war after year. Plot 5c or 18c. a market and cable of non. We want even a construction of the second dry so individual growers year after year. Pkt. 5c, oz. 18c, Pkt. 5c, oz. 20c, ¹/₄ lb. 60c, lb. \$2,00.

ARCE RED WETHERSFIE

600 TO 800 BU PER AC

AN ORDINARY CROPTRONG

It is oftentimes a matter of choice of color what onion is grown. To those growers who prefer a red variety we recommend our large Red Wethersfield. This is also one of our greatest specialties, and next to Yellow Globe Danvers we sell the largest quannext to Yellow Globe harvers we sell the largest quan-tity of seed of it. It is the most reliable red Onion grown for general purposes. It yields enormous crops; from 600 to 800 bus, per acre, and is a most reliable cropper even under unfavorable conditions. Large size, purplish-red skin, flesh purplish-while, form round, deater d disc grained unobrated across favore. The flattened, the grained, moderately strong flavor. The best keeper. Especially adapted to poor and dry soils. **Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2,00.**

SHORT CROP Some other houses will tell you that the crops of Orion S rd. orrevery short this year and they will ask we have a full yield. Our prices. While it is true many plaitings were an entire failure, yet our crops were fine and we have a full yield. Our prices are correspondingly moderate. A fuller to realize a good yield of Onion Seed may be attributable to inferior bulbs planted. Our seed is grown from selected hand-picked bulbs.

All of the varieties grow very rapidly from seed, and are sweeter and of more delicate flavor than our American onions; bulbs of the **most beautiful shape and color**. While we advise growers to devote their main crop to the American varieties, yet we recommend them to vary it by planti g part of the Italians. We recommend them highly for summer and autumn use in the family, while if marketed they command fancy prices.

Giant Rocca or Naples. One of the e best known of the Italian onions in this country. Quite extensively grown in some sections, where they produce immense crops; single bulbs weighing 1½ to 2 pounds each. Flavor very mild and delicate; color, light brown: flesh, white; very handsome; globular shape; a good keeper. Pkt. 5c, oz. 15c, ½ 1b. 50c, lb. \$1.75.

Mammoth Silver King. This is unquestionably world. Single specimens have weighed as much as $3\frac{1}{4}$ pounds. No other onion excels i. mild and delicate havor, or has a more handsome and beautiful silvery white appearance. So mild are they in taste that they can be eaten raw like an apple. They always command a high price in the market. Pkt. 10c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. $\frac{32}{5}$.

Spanish King. The outside skin is of a while the flesh is white, sweet, mild and tender. They bottom well, are free from stiff necks, and have produced more bushels (1,127) marketable onions to the acre than any other variety known. Very rapid growth and matures early. In market it attracts marked as tention. Pkt. 10c, oz. 25c, 14 D. 75c, 1b. \$2.50.

Giant White Italian Tripoli Of 1 arge size and with fine white skin. The first season from the black seed, it will grove an onion from 1 to 1½ pound, but to attain the full size seed should be started In a hot bed and transplanted. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

American Extra Early Pearl This remarkable earliest and in great size, thickness, rapid growth, bottoming and keeping qualities, it is scarcely excelled. It grows quickly to an enormouts size, of pearly white color, the outer skin having a most showy, waxy appearance, flesh of a pure snow white, and flavor so mild that it can be eaten like an apple. This onion has the valuable quality of resisting Northern winters. Sow the seed in the spring, thickly, and raise sets. These can be set out in September or October, and early in May the onions are as large as hen's eggs. Pkt. 10c, oz. 30c, $\frac{1}{10}$ 15c, 1b. \$2.50.

AMERICAN VARIETIES OF ONION SEED-Continued.

LARGE RED GLOBE- This is a very handsome variety, and is deserving of general cultivation. It matures quite early; grows to a large size; skin deep red; flesh fine grained, mild and tender. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.25, 3 lbs. or more by express at \$2.00.

WHITE GLOBE—A largeglobe-shaped onion; firm, fine grained of mild flavor; keeps well. This is one of the handsomestonions grown, of beautiful shape, clear, white skin, and commands the highest market price. Pkt. 5c, oz. 25c, ½ lb. 75c, lb. \$2.50, post paid, by mail.

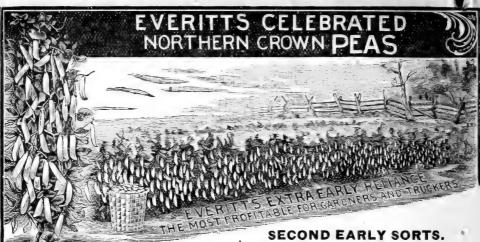

SOUTHPORT LARGE YELLOW GLOBE-This new variety is entirely distinct from the Danvers. It is a very handsome, round or globe-shaped variety, of large size, with thin yellow skin, white flesh, fine grained, mild, very firm, and the best of keepers. It ripens early and sells readily at the highest prices in our markets. It is a most reliable variety for bottoming, and entirely free from scallions. Pkt. 5c, oz. 20c, 24 lb. 60c, lb. \$2.00, 5 lbs. and over by express, \$1.85.

WHITE SILVERSKIN, or WHITE PORTUGAL -Very desirable for family use; flavor mild and pleasant; skin silvery white; of handsome appearance; highly esteemed for pickling when young, also for market in early winter. Extensively planted for White Onion Sets. Pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.75.

EXTRA EARLY RED-Very early, medium size, deep red color. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. 81.50, 3 lbs. or over by express at \$1.35 per lb.

EXTRA EARLY WHITE BARLETTA-Without doubt the very earliest onion in cultivation, Pure white color, very mild and delicate flavor. For table use and pickling it is most valuable. Pkt. 5c, oz. 25c, ½ lb. 75c, lb. \$2.50.

WHITE QUEEN-A small very early, variety. In season very early. The quality is excellent, being very mild. Pure white outside and inside. Can be sown from February to July. Largely grown for pickling. Pkt. 5c, oz. 15c, ½ lb. 50c, lb. \$1.50.

EXTRA EARLY SORTS.

Everitt's Extra Early Reliance.

In all the essentials of an early market or home garden pea this is perfection. It has made friends wherever planted, and is acknowledged by all acquainted its merits as being unexcelled in earliness and amith with its merits as being unexcelled in earliness and productiveness. They are now largely grown by the best gardeners in the country. Height about two feet, vines loaded with well-filled pods. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.50, 5 bus. \$22.50, 10 bus. \$40. *McLEAN'S LITTLE GEM—A dwarf, prolific, green, wrinkled marrow, having all the flavor of late wrinkled pees Height one foot: require no support Largely

peas. Height, one foot; require no suport. Largely grown for canning. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$5.50, 5 bus. \$25.00. *AMERICAN WONDER-So well and favorably

*AMERICAN WONDER-50 Went and tayond is known that it scarcely needs description. Our seed is strictly true to name and the choicest strain. Ex-strictly true to name and the choicest strain. Extra early; requires no bushing; exquisite flavor. The vine grows from 8 to 20 in. high, according to soil and season. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.75, bu. \$6.50, 5 bus. \$30.00. ALASKA—This beautiful blue pea has become a

standard variety and is the earliest of all blue peas, proving to be not only several days earlier than most early sorts, but of larger size and 10 per cent. more pro-ductive. The vines are dwarf, growing only about 20 ductive. inches high, very uniform, naturing the crop for one picking; of excellent quality. **Pkt. 5c**, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.75. FIRST AND BEST-Vines small; about 18 inches

FIRST AND BEST-vines small; about 18 incness high, bearing 3 to 7 straight, handsome pods, each con-taining six to eight medium sized round peas of good quality. Matures all the pods in about 45 days. Valu-able for market gardeners. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bn. \$4.00, 5 bn. \$18.50. KENTISH INVICTA-A round, blue variety, pro-

ducing straight and handsome well-filled pods, and is quite early. We regard it as a market variety of unsurpassed excellence, and can be planted for a general crop

as well as early one. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.00, 5 bu. \$18.50. *EXTRA EARLY PREMIUM GEM-Very fine dwarf pea, of Little Gem type, on which it is a decided improvement; larger pods; more productive. Best and most profitable Early Wrinkled Pea for market gardeners, and for family gardeners there is none better. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.50, bu. \$5.50, 5 bus. \$25.00.

*PERFECTION-A smooth blue pea growing about 1½ foot high. Valuable for canners. Quality and flavor cannot be surpassed. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.00.

HORSFORD'S MARKET GARDEN-A most excellent second early pea, particularly suited for the market garden on accourt of its great productiveness as well as good quality. It grows about two feet high, very stocky and requires no sticks. Pkt. 5c, pt. 25c, qt. 45c, 1/4 bu. \$1.75, bu. \$6.50.

*SATISFACTION-This delicious pea is fast gaining in popularity, and many of our customers are now placing their main reliance on them and consider them su-

ing their main reliance on them and consider them sup-perior to any other for fine table qualities. The vine grows vigorously to the height of about 2% feet, requiring no brush or sticks to hold them up, be-ing very stocky and robust, and literally filled with large showy pods, which almost hide their foliage. They continue in bearing longer than any other early sort. The peas when green are unusually large; when dry are much more wrinkled than any other sort. large: Satisfaction has come to stay. Pkt. 10c, pt. 30c, qt. 50c, post paid. 3 qts. \$1.00 by freight or express.

*NEW ABUNDANCE—This new variety is the most prolific known. Plant, half dwarf; 15 to 18 inches high; ioliage, large, thick, full and dark green. Pods, 3 to 8½ foliage, large, thick, full and dark green. Pods, 3 to 3% inches long, roundish and well-filled, containing six to eight large wrinkled peas of excellent quality. Pkt. 5c, pt. 35c, qt. 40c, peck \$1.25, bu. \$4.75.

LATE SORTS.

*PRIDE OF THE MARKET-Requires no sticks and are quite unequalled in productiveness. Robust, free-branching habit 18 to 20 inches high, and are im-mensely productive. The polts are so large in size and handsome in appearance that they take high rank for exhibition purposes, and the peas, when on the table, are of so splendid a quality that it would be difficult to over-praise them. Pkt. 5c, pt. 25c, qt. 45c, 1/4 bu. \$1.75, bu. \$6.75.

BLACK-EYED MARROWFAT-A favorite variety; grows about five feet high; a profuse bearer; pods large and well filled. Pkt. 5c, pt. 20c, qt. 30c, peck 75c, bu. \$2.50, 5 bu. \$12.00, 10 bu. \$22.50.

LARGE WHITE MARROWFAT-A favorite sort.

LARGE WHITE MARROWFAT—A favorite sort, About six feet high. Pods harge, broad, and well filled, of excellent quality. Pkt. 5c, pt. 20c, qt. 30c, peck 75c, bu. \$2.75, 5 bu. \$12.00. *CHAMPION OF ENGLAND—A standard sort, sought after in all markets. Can not be excelled for family use; productive; high flavor; seeds wrinkled. Five feet high. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.75, 5 bu. \$18.00.

***TELEPHONE-**A tall wrinkled marrow; very productive, and of the best quality, with long pods contain-ing 7 to 10 very fine flavored peas. Height, about four feet. Pkt. 5c, pt. 25c, qt. 45c, peck \$1,75, bu. \$6.00.

TALL WHITE SUGAR (Edible pods)-Seeds white. Foliage, light green; a well known variety; height, 3 feet. Pkt. 5c, pt. 25c, qt. 45c, peck \$1.75, TALL pods)-Seeds bu. \$7.00.

SWEET MELTING SUGAR-The best sugar pea; crop very short. Pkt. 10c, pt. 35c, qt. 50c.

FIELD PEAS-Used for field culture only. Price, \$1.25 per bushel, subject to change.

EVERBEARING PEA.

A variety maturing soon after the Gems, and continuing a long time in bearing. Vine stout, about 18 inches high, bearing at the top 6 to 10 broad pods, each pod containing 6 to 8 large

Peas. If these are removed as they mature. and the season and soil are favorable, the plant will throw out from the axil of each leaf, branches bearing pods which will mature in succession, thus prolonging the season on account of its branching habit; they should be planted thinly; a pint of seed planting as much as a quart of other kinds. Peas wrinkled, large, cooking quickly and very tender, superior flavor; remarkable summer and autumn variety everywhere esteemed. Pkt. 10c, pt. 25c, qt. 40c, peck \$1.50.

PARSNIPS¹ oz. of Seed to 200 ft. of Drill, *b* to 6 lbs, per acre. **IMPROVED CROWN PARSNIPS** A selec-tion from the Hollow Crown **PARSNIPS** A selec-tion from the Hollow Crown **PARSNIPS**. smooth, and fin st variety for home or market Garden.

Pkt. 5c, oz. 10c, ¼ 1b. 25c, 1b. 75c. LONG WHITE—A standard variety of great merit. Pkt. 5c, oz. 10c, ¼ 1b. 20c, 1b. 50c.

PARSLEY One ounce to 200 feet of Drill. Fine Curled or Double Parsley-Used principally as a garnish for the table. Pkt. 5c, oz. 10c, 1b. 20c, 1b. 75c.

New Fern-Leaved-A new variety; very orna-namental in form and coloring. Pkt. 5c, oz. 15c, 1/4 1b. 40c. 1b. \$1.25.

GOLDEN DAWN-A most b ful golden yellow, making it most elegant in a pearance, either in growth or for table. In productiveness they stand at the head of the list. The flavor is particularly sweet a mild, and entirely free from any fiery flavor, so much so, that they can be eaten like fruit. Pkt. 5c, oz. 20c, ¼ 1b. 75c.

PEPPERS.

PROCOPP'S GIANT-The real giant among all peppers, frequently growing 8 to 9 inches long by 3 inches in diameter. Besides being wonderfully large, they are also beauties; color, a glossy scarlet; flesh, nearly a | alf inch thick, sweet and mild. Every exhibitor should grow them to a.d to his collection. Pkt. 10c, 3 pkts. 25c, oz. 50c. RUBY KING-This magnificent Pepper grows 4½ inches long by 3½ to 4 inches broad. When ripe, they are bright.ruby red long by 3½ to 4 inches broad. When ripe, this ripen 8 to 15 fruits. Pkt. 5c, oz. 30c, ¼ lb. 75c. LARGE BELL, or BULL NOSE-Early, very large. Square form, pleasant to the taske, very suitable for filling with cab-bage. Pkt. 5c, oz. 20c, ¼ lb. 75c. Ins 5the vegetable that furnishes the Cayenne Pepper of commerce. Pkt. 5c, oz.

SUMMERERADIS

SHEPHERD—Another year's trial finds this famous radish still at the head of the list as the best and earliest long radish in existence, and all who have grown them say they are the best long radish in the country. In fine appearance it is unapproached. Excels all others in rapid growth, attaining a size of 12 in. in length and 11-2 in. in thickness in 30 days from sowing the seed, and will grow 20 inches in length and 3 or inches thick before becoming hard and woody. It is the earliest, the largest, remains tender longest, the handsomest, best for the family, for market, and is good spring, summer and fall. Pkt. 5, oz. $10c, \frac{14}{2}$ 10. 25c, 1b. 85c.

WOOD'S EARLY FRAME-A long, red radish, exceedingly small top; most excellent for forcing.

IMPROVED EARLY LONG SCARLET SHORT TOP-Of quick growth; color bright scarlet; long, straight and smooth, crisp and tender.

LONG WHITE VIENNA-The finest and most beautiful long white radish in , cultivation. Most attractive, straight and smooth, tender, mild flavor, grow quickly. Pkt. Sc, oz. 15c, ½ Ib. 30c, Ib. 81.00.

1. GIANT WHITE STUTTGART—Very early and of quick growth. Both flesh and skin are pure snowy white. It withstands the severest heat, and grows to an immense size. The quality is always *the very finest*, firm, brittle and not pithy.

2. **NEWCOM**—This is the earliest, largest, white radish known. Owing to their beautiful half-long shape and fine appearance they readily sell at double the prices of ordinary varieties. Quality very fine.

3. BRIGHTEST LONG SCARLET, WHITE TIPPED-Fit for use in 25 days after sowing. Color is the brightest scarlet, except the tails, which are tipped white. This sort outsells any other long red radish that is put in competition with it on the market. Pkt. 5c, oz. 15c, ¼ lb. 30c, lb. \$1.00.

5. **IMP. EARLY SCARLET TURNIP**—A decided improvement, both in earliness and brilliancy of color, over the scarlet turnip, and is especially recommended to market gardeners.

6. EARLY WHITE TURNIP—Small top, quick of growth; both skin and flesh
 pure white, crisp and tender.

SHEPARD 8. EARLY SCARLET TURNIP, WHITE TIPPED—Beautiful scarlet variety, of handsome shape, having a white-tipped tail, or root. Very fine.

9. WHITE BOX — Its short top and rapid growth fits it for growing under glass, in frames or boxes, hence its name, as well as for early sowing in the open ground.

15

7

LA EVERITT

10. EARLY YELLOW SUMMER TURNIP-Oblong, turnip-shaped and russet-colored sort, grows much larger than the white or red turnip sorts. Best kind for resisting the extreme heat and the drought of the Southern States.

> 11. EARLY FRENCH BREAKFAST-Eatliest of all; very tender and beautful; oval shape; scarlet, tipped with white; great favorite.

12. SCARLET OLIVE-SHAPED— Bright scarlet color, and well adapted for either forcing or for early sowing in the garden.

H

15. EARLY WHITE OLIVE-SHAPED-White skin and crisp, white flesh. Is very early.

RADISHES-(Continued).

14. LARGE WHITE GLOBE-A very large round summer turnip radish. Of beautiful form, pure white skin and flesh, which is very crisp and brittle. It grows quickly to a large size, and withstands summer heat.

13. TWENTY DAY FORCING OR THE STARTLE-A new and very distinct type of the well known olive shaped radish, which is of perfect form, smooth skin, shaped radish, which is of perfect form, smooth skin, summer varieties in our list. Gives great satisfac-tion. Pkt. 10c, oz. 15c, ¼ lb. 30c, lb. \$1.00.

with its extremely quick growth, taking only three weeks to mature, renders it extraordinarily valuable for forcing, while it does equally well in the open ground. Pkt. 5c, oz. 15c, 1/4 b. 30c, b. \$1.00.

NEW WHITE STRASBURG-One of the most popular summer radishes grown. Of handsome ob-long shape, tapering beautifully to a point; both skin and flesh are pure white and almost transparent; very tender and of a delightful pungent taste.

SUMMER VARIETIES, MIXED-Includes all the

WINTER RADISHES.

Price of all varieties : Pkts. 5c. oz. 10c, 1/4 lb. 25c, 1b. 75c.

The following varieties should be sown in August or September, and stored in pits or the cellar on approach of winter, for use during the winter. Our collection embraces all the desirable sorts. Our Mixed Seed will give great satisfaction.

CALIFORNIA MAMMOTH WHITE—A Chinese variety introduced into California; it grows to a large size; flesh quite solid, and of good flavor. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

LONG BLACK SPANISH-One of the latest as well as the hardiest of the radishes. Roots oblong, black, of a very large size and firm texture. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.

WHITE CHINESE-Root nearly cylindrical, six to seven inches long, and nearly three inches in diameter; neck rounded, skin white, flesh white, compact, piquant and very appetizing. **Pkt. 5c, oz. 10c, ½ Ib. 25c, Ib. 75c.**

ROUND BLACK SPANISH - Black skin, white flesh, and roots globe-shaped. The flavor is piquant. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.

CHINESE ROSE-This variety has become very popular with market gardeners. It is of a half-long shape, pink color, and flesh as solid as an apple. It should be sown during August. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

WINTER VARIETIES, MIXED-Includes all the winter varieties in our list. Large Pkt. 10c, 1/4 lb. 30c, 1b. 85c.

SOUASHES.

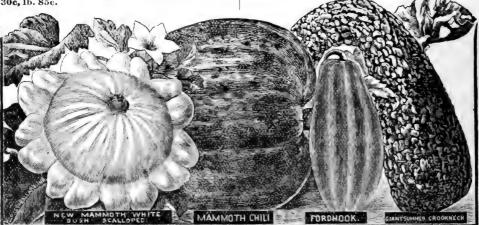

GRAND GOOD SQUASHES 15c. 4 1 Pkt. of Each for

MAMMOTH CHILI-The largest of the squash family, being simply immense. The largest squash on record-299 pounds-was of this variety. If you want to secure the premium at your county fair, plant some of this seed. Color, orange yellow, smooth skin; The largest squash is variety. If you flesh very thick and fine grained, good and nutritious. A profitable variety to grow for stock feeding. Keeps well through the winter. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.50.

MAMMOTH WHITE BUSH, SCALLOPED-The squashes are very uniform in shape and wonderfully prolific. They are fit to use very early, are of a beautiful white color, and grow to an immense size-12 to 15 inches across. The bush-like habit of growth is exacty the same as the old variety. Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 80c.

GLANT SUMMER CROOKNECK-This new strain is even earlier than the common variety; the squashes grow to an extra large size, measuring from 18 inches to 2 feet long, and of finest quality. Their handsome appearance commands an extra price on the market. Pkt. 5c, oz. 10c, 1/4 lb. 25c, 1b. 75c.

FORDHOOK — An extremely handsome variety, bright yellow outside, and straw yellow within. The flesh is dry and sweet, and of the best quality. Placed in a cool, dry room, keeps in perfect condition through-out the winter. It is perfectly free from attacks of the out the winter. It is perfectly free from attacks of the squash borer. Matures early, and is everywhere a sure

SQUASHES-(Continued).

cropper. Immensely productive. The green squashes can be used at any stage of their growth. Pkt. 5c, oz. 15c, 1/4 1b. 40c, lb. \$1.20.

PROLIFIC ORANGE MARROW-An improved Boston Marrow, two weeks earlier and much more pro-ductive. The skin is a rich, deep orange, making the squash of very handsome appearance. As large as the Hubbard; the flesh is very thick, fine grained and of choice quality. The squashes are in prime condition from September to January. Pkt. 5c, oz. 10c, ½ lb. 20c, 1b. 60c.

HUBBARD-Generally considered the best winter squash grown; flesh dark yellow, fine grained, dry and sweet; very hard shell; will keep till spring; produc-tive; color, green, when ripe. **Pkt. 5c, oz. 10c**, ¼ **1b. 25c**, **1b. 75c**.

YELLOW BUSH — A popular variety. Grows to medium size and of unsurpassed quality. Pkt. 5c, oz. Grows to 10c, 1/4 lb. 20c, lb. 60c.

ESSEX HYBRID-A very productive squash, of the finest quality, and an excellent keeper, specimens hav-ing been kept until June as sound and good as when gathered. Early, quick growth, and can be raised very successfully as a second crop, following early potatoes,

RHUBARB.

broad and from two to three feet high. Excellent for pies. Pkt. 5c, oz. 15c, 1/4 lb 40c, lb. \$1.25.

ies. Pkt. 5c, oz. 15c, ½ 10 40c, 40. ener. Leaves large, t Rhubarb Koots-By mail, 30c per lb., 4 lbs. dener. Leaves large, t 8c, ½ lb. 15c, lb. 35c. \$1.00. By freight or express, \$1.50 per dozen.

SALSIFY.

MAMMOTH SANDWICH ISLAND-Mammoth, indeed, as compared with the common kinds. It is pure white in color and has all the good qualities of the other, which, with its great size, will recommend it to all gardeners. It should be found in every garden in the land. Pkt. 5c, oz. 15c, 1/4 lb. 40c, lb, \$1.25.

Long White-Pkt. 5c, oz. 15c, 1/4 lb. 40c, lb. \$1.25.

TOMATOES

Our seed is saved with great care." We never buy seed saved at canning factories, which usually is badly mixed and proves a great annoyance and loss to the planter.

1 oz. will produce about 4000 plants, Sow about 2 ozs. of seed in beds for each acre of crop you want to grow.

MIKADO-Also called Turner's Hybrid, is one of the finest, largest, most solid, and most productive tomatoes grown. The heaviest tomato ever grown of this mammoth variety was grown from O.K. Seeds -weight, 4 lbs. 2 oz. Rapid grower, thick stalk; beautitul shape and color; the weight averages from 1 to 4 lbs. Pkt. 5c, oz. 25c, 1/4 lb. 75c, lb. \$2.50.

Mikado.

EARLY ESSEX HYBRID-This is one of the most EARLY ESSEX HYBRID-Inisis one of the most profitable tomatoes for the market in cultivation. Pink skin, very early and always ripening all over alike. The flesh being very hard and solid makes it one of the best tomatoes for shipping or marketing. We recom-mend it highly. Pkt. 5c, oz. 20c, ½ Ib. 60c, Ib. \$2.00.

OPTIMUS—The large handsome tomatoes are free from cracks and are borne in clusters of three to five. The flesh is fine grained and solid, of a bright

peas, etc. Pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 65c, postpaid.

SIBLEY, or PIKE'S PEAK-Shell pale green in color, very hard and flinty, but so very thin and smooth as to occasion the least possible waste in baking. The flesh is solid and thick; a vivid, brilliant orange color, dry, and of a rich delicate flavor. They weigh from 8 to Il pounds. Very productive; ripens its fruit with the Hubbard. It remains in a good dry cellar perfectly sound until the last of March. Pkt. 5c, 9z. 10c, ¼ lb. 25c, 1b. 75c.

CANADA WINTER CROOKNECK-The best of keepers. Color, pale green; excellent for table use. Pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 60c.

MARBLEHEAD-An excellent variety, resembling the Hubbard. A remarkable combination of sweet-ness, dryness and delicious flavor. Pkt. 5c, oz. 10c, 1/4 1b. 20c, 1b. 75c.

NEW GOLDEN CUSTARD-An improvement on the old Yellow Bush so well and widely known. Very early, of a bright, golden yellow, often producing squashes 12 to 15 inches across. Pkt. 5c, oz. 10c; ¼ lb. 30c, 1b. \$1.00.

SUMMER CROOKNECK-Early and productive; small size, bright yellow, hard shell; used while young and tender and can not be excelled. Pkt. 4c, oz. 8c, 1/4 lb. 20c, lb. 75c.

SPINACH.

Victoria-Very large stalks, from two to three inches We will send 5 lbs. or more of any variety of Spinach by freight or express, at 25c per lb. Thick-Leaved Round-Generally preferred for early sowing, and is a popular sort with market gar-Leaves large, thick and fleshy. Pkt. 4c, oz.

American Savoy.

AMERICAN SAVOY-A sort of the finest quality, and producing nearly twice the weight of crop as other sorts, and is also the hardiest of all Spinachs. The leaves are numerous, succulent, curled and wrinkled like a Savoy Cabbage. Pkt. 4c, oz. 8c, 1/4 lb. 15c, lb. 35c.

BLOOMSDALE-The leaves are numerous and par-tially rolled. It is much liked by gardeners wherever introduced. Pkt. 4c, oz. 8c, ¼ lb. 15c, lb. 35c.

crimson scarlet color. Very early. One noticeable fea-ture is the splendid keeping and shipping quality of the tometer But the terminal splendid to the terminal splendid the tomato, Pkt. 5c, oz. 20c, 1/4 lb. 60c, lb. \$2.00.

IMPROVED TROPHY-Fruit large, smooth and solid, fine color; very productive; a well-known and popular market sort. Pkt. 5c, oz. 20c, ¹/₄ lb. 60c, 1b. \$2.00.

PERFECTION-Shaped like the Acme, but some what larger, fully as early, perfectly smooth, blood-red in color, with more solid flesh and fewer seeds and pro-

Selected Acme.

duces more and larger fruit at the end of the season. Pkt. 5c, oz. 20c, ¼ lb. 60c, lb. \$2.00.

SELECTED ACME-One of the earliest in cultiva-tion. Fruit of medium size, perfect form, round, slightly depressed at the poles; pink purplish color. Ripens evenly and has no green core. Bears continuously until frost comes. Pkt. 5c, oz. 20c, ¹/₄ comes. Pkt. 5c, c lb. 65c, lb. \$2.00.

Giant Climbing TOMATO

т O REAT progress has been made in late years in the improvement of the tomato. Quite in contrast with the small ill-shaped, somt specimens of a few years ago are the large, smooth, sweet fruits so easily raised now. Great rivalry exists in localities as to who can raise the earliest or the largest tomatoes. We offer in the GIANT CLIMBING TOMATO the greatest novely in this line and whoever rejest to according in this line, and whoever raises it, according to directions printed on each package, will have an attraction that will draw all eyes toward

their garden. This is not a tree tomato. The term "tree," frequently applied to tomatoes, is generally in-tended to mislead. We do not call grapes "Tree Grapes," because they will climb up a trellis. The **GIANT CLIMBING TOMATO** needs a support to climb upon, when they will grow 10 to 15 feet high, bearing fruit all along the vine from the ground up. The tomatoes grow to weigh from 2 to 4 lbs. each, and in size 10 to 16 ins. in circumference. Nearly all the tomatoes The increasing are smooth and regular in shape; color glossy red; sound to the core, with very few seeds. The flavor is all that can be desired. They are ever-bearing, only cut off by frost. These to matoes can be grown on the garden fence, on the submy side of a house or submidding or its the sunny side of a house or outbuilding, or in any position where a support is provided The more public the situation the more will they

given, if space permitted : be admired. We print a few reports.

"Your Giant Climbing Tomatoes are immense. I have them weighing 234 lbs., and the people see that they are wonderful" they are wonderful.

GEO. R. BOOTH, Ludlow, Mass.

"One plant of Giant Tomatoes grew over 8 feet igh. The best cluster was 7 tomatoes weighing 6 is all ripe at one tim." high. lbs. all ripe at one tim

WM. YEATES, Titusville, Pa.

"The Giant Climbing Tomatoes are wonderful in size and fine quality. One fruit weighed 3 lbs. 1 oz. C. H. Cox, Bascobel, Pa

"The Giant Tomatoes averaged a yield of nearly a bushel to each plant. One vine grew 14 feet high." H. D. MUSSER, Rohrestown, Pa.

"It is a pleasure to see your Giant Climbing Tomatoes grow, and any person can well be proud of them. They are mammoth in size and wonderful in tall growth. have some specimens measuring 16 ins. in circ_mference and over 6 inches i diameter. Fine flavor and better than I thought they could be. You can n t recommend them too highly. MRS. WM. CRABBE, West Branch, Cal.

"From the Giant Tomato seed I raised the greatest crop I ever saw. One weighed 3 lbs, and many 2 lbs, each. P. J. DIGGS, Mallory, Va.

"I raised one stem of Giant Climbing Tomatoes con-taining 37 fruits. My heaviest tomato weighed 3 bas 3% ozs.; measured 8% ins. in diameter. They are enor-mous yielders. T. HARRIS, Abbott, Neb.

Price of Everitt's Giant Climbing Tomato Seed.

As this tomato is a very shy bearer of seed the price will always be high, yet when you consider that each plant, with proper care, will produce nearly a bushel of tomatoes, the price should not be considered. 1 liberal package 15c, 2 for 25c, 5 for 50c. Families should club together and get them at wholesale rates.

CAUTION There are the short growing bush (called Tree) Tomatoes and the long growing (called Tree) Tomatoes, but if you want the true Giant Climbing Tomato, order your seed of us and you will not be disappointed.

NEW STONE-This new main crop variety of tomatoes is W STONE-This new main crop variety of tomatoes is very large, bright scalet red color, smooth shape. Its distin-guishing feature, and from this it takes its name, is its greatest solidity. The flesh is very firm. One of the best ship-pers. A grand canling variety, unsurpassed for kerping.
 Pitt. 5c, oz. 20c, ½ 1b. 73c.
 PODEROSO-A mammoth variety introduced by Henderson, for which \$250.00 was paid for a name. We will sell you a packet for 10c, or 3 for 25c.
 Golden Queen-There are many varieties of fine red tomatoes, but every gardener will hnil with delight this fine. Pkt. 5c, oz. 20c, ½ 1b. 65c, 1b. \$2.00.

OMA

BING

LIVINGSTON'S NEW BEAUTY-A fine variety, coming from originator of Acme, Paragon, Perfection and Fa-vorite. Very distinct from all former introductions. The color is a glossy crimson with a purple tinge. It grows in clusters of four and five, retaining its large size late in the season; very solid, with a tough skin, making it very desirable for market and shipping. **Pkt. 5c, oz. 20c, 14 lb. 65c, lb.**

LONGKEEPER—This new tomato of recent intro-duction was originated by E. S. Carman, editor of "The Rural New Yorker." It is claimed by the originator to

20c, 1/4 Ib. 65c, 1b. \$2.00.

Paragon-Very similar to that of Livingston's Favor-Pkt. 5c, oz. 20c, 1/4 lb. ite. 85c. 1b. \$2.00.

Tomatoes for Preserv-ing-Red Cherry, Yellow Cherry, Red Pear-shaped and Yellow Plum. Pkt. 5c, oz. 25c.

TURNIPS. * TABLE VARIETIES. 1 oz. will plant 250 feet of Drill.

Sow about 1 pound broad-cast per acre.

We sell day of the following varieties, unless noted, at pkt. 5c, oz. 12c, ¼ lb. 20c, lb. 50c, by mail; by freight or express, per lb. 40c.

Early Six Weeks or Snowball-This new turnip is early six weeks of showning rapidly. Bulbs beau-tiful white; medium size, solid. Flavor mild; free from side roots. Ekt. 5c. oz. 10c. ¹/₂ h. 20c. lb. 60c. PURPLE TOP MUNICH—One of the earliest in

cultivation, making an excellent spring garden turnip. RED or PURPLE-TOP STRAP LEAVED—One of the most popular varieties, both for table and stock. Grows to a large size, solid, crisp and mild fla-We have the best strain of this popular variety vor. that can be found anywhere. None better. EXTRA EARLY MILAN—The earliest flat tur-

EXTRA EARLY MILAN-The earliest nat tur-nip in cultivation. Of medium size, with a bright purple top; leaves few, short, growing very compact, flesh pure white, of choicest quality, hard, solid and fine-grained; an excellent keeper. Pkt. 5c, oz. 10c, ½ 1b. 30c, lb. \$1.00. EARLY WHITE FLAT DUTCH-Size, medium. Flat white sweat tandar: ich for toble, spring and

Flat, white, sweet, tender; rich for table; spring and fall

WHITE EGG—A variety of very rapid growth; egg-shaped, thin white skin, solid, firm, fine-grained flesh, BREAD-STONE-Extra fine quality. Of medium size, very quick growing, and the roots are very smooth

and white. Flesh is perfectly white, fine-grained, and cooks in only fifteen minutes. It is the finest table turnip for winter and spring use. Pkt. 5c, oz. 15c, '4 lb. 30c, lb. use, P. 81.00.

Paragon.

PEACH TOMATO—This very useful and beautiful oddity is sure to attract attention and favorable comment, whether growing in the garden or served on the table. It is almost identical with some forms of peaches, table. It is almost identical with some forms of peaches, both in shape and color. The fruit is produced in clusters; is very solid with red interior, and red, pinkish and green blush on the outside skin, which can be easily peeled, like the skin of a peach. Vines compact in habit and very productive. For preserving, Peach Tomato is hard to beat. Pkt. 5c, oz. 20c, 2 oz. 35c. LIVINGSTON'S FA VO B-

ITE-Ripens evenly and early, holds its size to the end of the season. Is very prolific, few seeds, solid flesh, bears shipping long distances. Pkt. 5c, oz. 20c, ¼ b. 60c, lb. \$1.85. Cardinal—A beautiful car-cardinal—A beautiful car-

dinal red, very glossy look-ing when ripe; the flesh of the same brilliant color ripens evenly through, having no hard green core like many others; very few seeds. Round and un-

usually smooth and solid. Pkt. 5c, oz. 20c, ¹/₄ lb. 65c, lb. \$2.00.

Favorite.

SWEDES, OR RUTA-BAGAS. Price same as Turnips.

Grown for stock feed, and could be profitably cultivered on a much larger scale.

CARTER'S IMPERIAL—A hardy sort, excellent for table use or feeding stock. Does not run to long necks. This should be sown a month earlier than the other varieties.

LAING'S IMPROVED RUTA-BAGAS-One of the earliest and best for table. Handsomest variety, first-class quality. LARGE WHITE FRENCH-Excellent for table

use as well as stock. Large size, solid, mild and sweet. A desirable sort.

In July we will publish a SPECIAL TUR-N NIP Catalogue.

OF

LEA

Send for it.

RED of PURPLE TOP GLOBE—This is the most (productive variety and one of the handsomest; quality very fine for table; owing to its great yielding propensities, can be grown with great profit for stock. GOLDEN BALL or ORANGE JELLY-Very

beautiful and bright yellow turnip of medium size, sweet and delicious flavor.

Long White Cow Corn-Flesh white, fine-grained, sweet; keeps well. LARGE WHITE GLOBE-Often attain the weight of 12 pounds; extra good fall and winter, skin white. white.

Sweet German-Must be sown much earlier than the In the autumn flat turnips. and early winter it is apt to be hard, but softens in time

BULBS.

Department

Few flowers can compare with those from our Summer Flowering Bulbs. So easy of culture and quick in giving returns. The bulbs can be kept over winter, and will continue, year after year, to return in beauty the criginal triffing investment. Our bulbs are all of the highest grade and will be sent by mail, post paid, at prices quoted. 1-4 doz. at doz. rates.

For every dollar sent in for bulbs, select 25c worth extra. Thus, if you send \$1.00, select to amount of \$1.25.

nra

Caladium. (Elephant's Ear).

CALADIUM.

Esculetum (Elephant's Ears). The leaves of this giant plant often attain a length of 3 feet. Very suitable for single plant on lawn, beds or margins of water. Attains greatest size in a moist situation. Keep bulbs in dry sand over winter. Each 20c, doz. \$2.00, ½ doz. same rate.

1,000. GARDEN TREASURES.

A mixture of many varieties of beautiful, easy-growing flowers, produ-ing a constant and varied bloom the whole season and many blennials are perennials will appear in succeding years. For sowing where no care w be bestowed it is very fine. Large Pkt. 10e, ½ or. 15e, or. 25e, 1b. 75c. 1b. \$2.50.

Our Cleaning Department has been removed to the fifth story of our building, and by the addition of elevators, bins, etc., and the most perfect cleaning apparatus, we can now clean 4,000 bushels of Wheat, Oats and other coarse seed, or 1,000 bushels of Clover or Grass Seed daily. There is not another general seed house in the country possessing the facilities we have in this direction and but few enjoy such a trade as we are favored with.

CLOVER SEED. Price Liable to Vary.

Bags, extra for each 2½ bushels or less, 18c each. 1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express.

COMMON OR MEDIUM RED CLOVER—This is the variety in general cultivation, and is so well known that description is not necessary. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25. By freight or express, bu. \$5.75. Select Quality, bu. \$6.00; Highest Quality, bu. \$6.25.

MAMMOTH CLOVER. (Pea Vine or English). Like common or medium clover, but of larger growth. Largely grown. Of great value to sow on exhausted land. For hay, we recommend sowing a mixture of this and common clover. Much used for green manuring. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25. By freight or express, bu. \$6.00. Select Quality, bu. \$6.25; Highest Quality, bu. \$6.50.

ALSIKE. (Trifolium hybridum). This clover is deservedly in repute as one of the best perennial clovers, and is well adapted to this country. From the results of experiments, it is found to thrive on soils which are termed by farmers "clover sick." For this quality, especially, it has proved a valuable acquisition, and is now generally approved of in all mixtures of grasses and clovers. Should be more generally grown. Sow in spring same as common clover. It will stand for years. Seed weighs 60 lbs. per bushel and is very small. On this account a bushel will sow from 12 to 15 acres, making it one of the cheapest varieties to seed with. By mail, pkt. 10c, lb. 45c, 4 lbs. \$1.50. By freight or express, bu. \$7.50. Select Quality, bu. \$8.00; Highest quality, bu. \$8.50.

DUCERNE or ALFALFA CLOVER—Lucerne should not be sown on hard, compact soil, or with hard sub-soil, but on sandy, open or porous soil. Even where no other crop will grow, it finds its natural home, and yields enormously. The great value of Lucerne is in its enormous yield of sweet and nutritious forage, which is highly relished by stock, either when green or cured into hay. It will grow and yield abundantly in hot, dry sections, and on poor, light and sandy land, where no other grasses can be grown, for it sends its roots down to enormous depths, they having been found in sandy soil seventeen feet long. Sow about 15 lbs, per acre in March or April. It can be cut three times in a season, and will produce magnificent crops for 10 to 15 years without renewing. 60 lbs. per bu. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25. By freight or express, bu. \$6.50.

CRIMSON, or SCARLET CLOVER. (Trifolium Incarnatum). A more valuable crop than this annual clover does not exist. As an improver of the soil, or for an early summer forage or hay crop it is unsurpassed. As a green manuring crop for grain, fruit or trucking crops it gives the very best results, while for improving poor land it has no equal. It succeeds on nearly every kind of soil, standing Southern suns and Northern winters, and is now grown largely in a number of States, and has succeeded in every State in the Union where tried. Sow 10 to 15 hs. to the acre. Can be sown any month in the year. The best months for fall are August and September; for spring March and April. Pikt. 10c, 10. 40c, 4 lbs. \$1.25, bus. of 60 lbs. \$5.00 CRASS SEED. Price Liable to Vary.

Bags, extra for each 2½ bushels or less, 18c each. 1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express.

GRASS IS KING. Our most successful farmers are ows of a high quality of grasses. The low price of grain fails to net satisfactory returns. Stock growing is far more profitable, and by the opening up of extensive foreign markets is not likely soon to be overdone. Hence, seed more ground to meadows. Raise more stock.

TINOTHY. (Phleum Pratense). This is decidedly the best grass for hay, making a large return of strong, rich hay. Though somewhat coarse and hard, especially if allowed to ripen its seed, yet, if cut in the blossom, or directly after, is greatly relished by all kinds of stock, and especially so by horses, while it possesses a large percentage of nutritive matter in comparison with other agricultural grasses. It grows very rapidly and yields very large crops on favorable soils. 45 lbs. to bushel. Sow 6 to 8 quarts, spring or fall, to acre. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c., By freight or express, bu. \$2.75. Select Quality, bu. \$2.85; Highest Quality, bu. \$2.95.

KENTUCKY BLUE GRASS. (Poa Pratensis). This is known in some sections as "June Grass." It is the best pasture for our climate and soil, succeeding finely on hill lands and producing the most nourishing food for cattle; retains its qualities to a late period in winter, and further South affording abundant food throughout the winter. Sow early in the spring or fall, 1 to 2 bus. per acre. Extra Cleaned, pkt. 10c, 1b. 25c, 4 lbs. 75c, bu. \$1.25. Weight, 14 lbs. per bushel. Fancy, bu. \$1.50; Highest Quality, bu. \$1.75.

ORCHARD GRASS. (Dactylis Glomerata): This is one of the most valuable and widely known of all pasture grasses, coming earlier in the spring and remaining later in the autumn than any other. It grows about 2½ feet high, producing an immense quantity of leaves and foliage. Blooms with red clover, and makes with it an admirable hay. It is well adapted for sowing under trees in orchards, and very valuable either for grazing or for hay. 14 lbs. per bushel. Sow 1½ to 2 bus. to acre, either fall or spring. By mail, pkt. 10c, 1b. 25c, 4 lbs. 75c, bu. \$1.85. Highest Quality, bu. \$2.00.

RED TOP. (Agrostis Vulgaris). A valuable grass for moist soils and low lands. It is a good, permanent grass, standing our climate as well as any other, and, consequently, well suited to our pastures, in which it should be fed close, for if allowed to grow up to seed the cattle refuse it. On moist, rich soil it will grow 2 feet, and on poor, gravely soil, about half that height. 14 lbs. to bushel. Sow 2 bus. to acre, fall or spring. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, bu. 85c. Highest Quality, bu. 95c.

QUICK GROWING LAWN GRASS.

Fine lawns, grass patches or grass borders add to the beauty of a place almost or quite as much as flowers. In fact, a certain amount of good grass is essential to the proper display of flower beds and borders. The next important thing to good grass sward is to get it quick. We have prepared a grass mixture which will give a good sward the first year. It is the finest and quickest growing lawn grass ever sent out, and will give the greatest satisfaction. Sown early in the fail or spring. Lb. 40c, peck \$1.50, post paid. By express, peck, \$1.00, bu. \$3.00.

Everitt's Improved Farm Seeds

INDIANAPOLIS IS SITUATED IN THE CENTRE OF THE RICHEST AND MOST EX-TENSIVE AGRICULTURAL REGION ON THE FACE OF THE GLOBE AND BESIDES IT HAS SHIPPING FACILITIES UNSURPASSED BY ANY OTHER CITY IN THE COUN-TRY-WECAN SAVE YOU TIMEAND MONEY IF YOU GIVE US YOUR ORDER FOR FARM SEED.

ORN

AND

INTHE

SUFFICIENT attention is not given to farm seeds by the majority of farmers, and by most seedsmen this department is made of secondary importance. This is not as it should be. These are the crops in which the farmer is most interested. They are money crops. Success or failure depends on them, hence how important that those VARIAN Varieties be selected that are the most reliable and give the greatest results. As an

observing man passes through a farming community, those farmers can be pointed out who are enterprising, wide-awake and progressive. The surroundings are a fair index of the farmer. The experimenting farmer is the most prosperous of all. He recognizes that varieties of grain and vegetables are running out (dying) and that new ones must take their place. He procures seed of all the promising kinds, tests them and selects the best to grow. Thus he always has the best, and all farmers who understand their business know that there is a great difference between the best and the poorest varieties of farm crops. We can help farmers along the road to prosperity if they procure their farm seeds of us. They will LIFT THE MORTGAGE and swell the bank account.

Everitt's Mortgage-Lifter Corn.

Reliability is stamped upon every feature of this corn. It is a corn that has not failed to produce a paying crop in the worst corn year we have seen in Indiana in the past six years, and in favorable seasons yields 80 to 120 bushels per acre of the finest yellow corn that ever grew inside of corn musks. We know this corn will please. We will guarantee a rich harvest of the most superior corn that grows, if Mortgage-Lifter is planted. It is early and will mature in northern Ohio. Indiana, Illinois, etc. The grain is very deep, compact and heavy; ears medium to large size; small cob. 70 lbs. of dry corn on the ear, as our seed ears averaged, shelled 62 lbs. of corn, leaving only 81bs. of cob. We want every corn grower to plant some of the Mortgage-Lifter Corn. If you plant a field of it your profit will be big. If you don't plant much, plant a small lot, a peck, or pound, or ear. We are anxious to have every person who raises corn made acquainted with its merits without delay. We know it will do them good, and thus secure to us a friend and customer for O. K. Seeds.

O. K. Seeds. The Mortgage-Lifter Corn we introduced first in 1893. Our sales have been large and results beyond the reasonable expectation of parties planting it, as the past two seasons have been very trying ones In many cases this was the only variety of corn that made a reasonable yield. We regret exceedingly that we have not space to print many of the reports received. Below are samples:

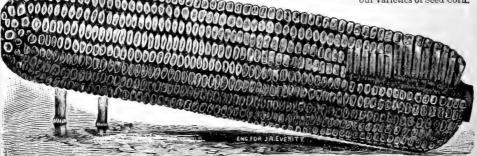

Mortgage-Lifter Corn I planted May 2d. The season was very dry, but my corn did not mind it and turned out 140 bushels per acre of as nice corn as I ever saw. H. F. STONE, Oakland Co., Mich.

Notwithstanding the extremely dry season, my Mortgage-Lifter Corn will make 80 bushels per acre. It is truly a mortgage lifter and can be depended upon in seasons when money is generally lacking for such purposes. J. E. ISENHOWER, Marion Co., Ind.

Price, by mail, 1 large sample ear, 25c, 4 for 75c, lb. 25c, 4 lba, 75c, By freight or express, ¼ bu. 75c, ½ bu. \$1.00, bu. \$2.00, 1 bag 2½ bu, \$4.25, 5 bu. \$7.50. Except sample ears price is for shelled corn. Let it be Understood. Let That has assen we did not have enough of this

Let it be Understood: 1st. That last season we did not have enough of this corn to supply the demand. 2d. That this season our supply is three times as great, but we expect a demand exceeding all previous records. 3d. It will be wise to place your orders early for any of our varieties of Seed Corn.

P

The Deepest Grained and Most Productive White Dent Corn. FORSYTH'S FAVORITE

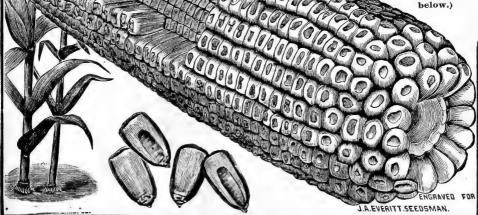

Our Introduction of 1892.

ON the preceding page we offer a corn that is remarkable in its reliability and is almost O^N the proceeding page we offer a corn that is remarkable in its reliability and is almost certain to bring success, as far as it can be realized in a corn crop, to all who raise it.
 On the next page we again offer the wonderful EARLY MASTODON, of which we sell thousands of bushels annually, and in not one season yet have we had a sufficient supply to meet the demand, while on this page and page 53 your particular attention is asked to the greatest of all white varieties of corn, Forsyth's Favorite and First Premium White Dents. Two grand yellows and two grand whites.

supply to meet the demand, while on this page and page so your particular attention is asked to the greatest of all while varieties of corn, Forsyth's Favorite and First Premium White Dents. Two grand yellows and two grand whites.
This corn was originated in Johnson Co., Ind., in that section known as the Garden Spot of this great Corn State, and in the few years since its distinct characteristics have been brought out, it has made both a local and national reputation. It is conceded to be the largest earder and deepest grained early white corn ever seen in this market. All who see it proclaim it a king in the great corn family. In describing this corn we must speak of the size of the ears as mammoth, being 8 to 15 inches long, with grains averaging about half inch long, and sometimes containing 1,500 to 2,000 grains are quite common. Grains pure white, cob white and usually hollow at butt end, which allows the ear to dry out quickly, and enables the grower to crib this corn before smaller varieties are fit. We recommend it for the latitude and all points South, and it can be grown 100 miles North by selecting ground that will admit of early planting. The following well-known farmers of Johnson County attest to the grand properties of this corn, and asy it can be cribbed ahead of any of their common field corn, and also that it yields enormously: M. V. Kindle, D. M. Forsyth, W. S. Core, J. S. Mountz, J. T. Walker, A. V. Pendleton, Geo. H. Pendleton, Edward Alexander, etc., etc.

Walker, A. v. I thutton, and der, etc., etc. We have sold this corn three seasons, with the most flattering results. It has become a great favorite. Our crop this year is exceptionally fine and notwith-standing the unfavorable season, is thoroughly matured. We have a large part of our seed in ears, and propose while these last, to put a sample ear in each order for 1/ bushel or more of shelled corn.

(Continued

We have space for only a few reports; could fill half this catalogue, if space permitted:

I am very much pleased with the Forsyth Favorite Corn.
 It is the largest corn I ever growed, and withal, is as early as my smaller eard varieties. It is a great money-making orm."
 ABRAHAM DOWNLY, Lancaster Co., Pa.
 "Forsyth Favorite White Dent is the largest, heaviest and

"As is usual with your seeds, I found the Forsyth Favorite Corn sustained the high recommendation you gave it. I am sure my trial plot yielded 150 bushels per acre of the finest corn I ever saw." DAVID ELDRIDGE, Cuyahoga Co., O.

"For the Forsyth Favorite White Dent Corn I must say, without boasting, that it is by far the finest I ever raised in

"Forsyth Favorite White Dent is the largest, heaviest and best corn I ever saw. On a test 52 ears weighed 70% pounds; the cob weighed 11% lbs." JOHN WAGGONER, Lincoln Co., Ky.

"30 acres of Forsyth Favorite Corn yielded 2,730 bushels of as fine corn as ever grew, The like was never seen before in all this section." C. F. PENDERTON, Hardin Co., Iowa,

PRICE By mail, post paid: 1 ear weighing 1 to 1½ 1b. and containing 1,000 to 2,000 grains, which will raise about 20 bushels of corn, 30c; 4 such ears for \$1.00. Those who order first will get the largest ears. 1 lb. shelled 25c, 4 lbs. 75c. By freight or express ½ bu. 75c, ½ bu. \$1.00, bu. \$2.00, 1 bag 2½ bus. \$4.25, 5 bus. \$7.50.

The price of this seed should not deter any farmer, who wants to be abreast of the times, from getting a start at once.

STILL IN THE FRONT RANK

The WONDERFUL EARLY MASTODON

YELLOW DENT CORN.

nds of bushels in stock. Notice the low price. You can not save your own seed for this money. What's the use of bothering? Get new seed. New blood. Bigger crops. Thousands of bushels in stock.

All who have tested the Early Mastodon Corn pronounce it the most valuable Yellow Dent Corn, of strongest growth, longest grain, largest ears, smallest cob, quickest to ear, finest folder, and most pro-ductive variety they ever raised. In short, we are fully convinced that if its merits were known by all corn-growers, there would be such a demand for seed that no six counties in the famous corn State of Indiana could grow enough seed

counties in the famous corn State of Indiana could grow enough s to supply the demand. Every corn-grower should get enough to plant a field or more, and thus get a variety of corn that will enormously increase his crop, and correspondingly increase his profits. Many bushels of Mastodon Corn can be sold in every neighborhood for seed at a large price, until all are supplied. We never before had such uniformly favorable reports for anything we sold. The growers can not praise this corn, the greatest novelty of the age in the corn line, suff-ciently. Read a few reports. We have hundreds more:

"I am well pleased with the Early Mastodon Corn. It was cut down by the frost the 24th of May, but came on strong, and yielded 73 bu. shelled corn per acre." M. BURNS, Darke Co., O.

"The Mastodon Corn is a marvel of the age. It is the finest corn I ever saw. I can not use words to praise it enough. It is the largest, deepest grained and best of all large field corns, and the earliest I ever saw. It is all you claim for it. All the neighbors want it. I will give you a few words from men of experience who have been at my farm and even the corn : of experience of a seen the corn : E. W. HARRIS, Custer Co., Neb.

"J. L. H. KNIGHT says: 'It snows under the Mammoth Cuban, Riley's Favorite, Chester County Mammoth, Leaming, and all the oth r corn I ever saw. Save me 8 bushels for seed.

"A. H. COPSEY, an extensive stock grower, says: "The Mastodon is a marvel. It is surely perfection. Save me 10 bu, for seed.' "F. D. MILLS says: 'Won-

"F. D. MILLS says: 'W ders will never cease. Mastodon takes the cake. I want 6 bu. for seed.' "W. H. CRAMER, Sup't Agriculture, at State Fair, says: 'The Mastodon Corn was the first thing that caught the eyes of the farmers. It walked off with the prize. want 10

bu. for seed.

"FRANK BERGER Savs: 'Send me 9 bu. of that Mastodon Corn. It just caps the climax.' "WM. MURRAY says: 'Save me 8

bu. of that seed. It's the finest corn I ever

saw.' "I could send you doz-ens of such testimonials, but think the above enough. Yours, E. E. HARRIS, Custer Co., Neb."

"I have grown nearly of the improved high-bred corn, and find Early Masto-It grows quick, strong and

⁴¹ have grown nearly of the improved high-bred corn, and hi don the most wonderful of all, and the handsomest. It grows qu powerful, has broad, heavy leaves, and large 20 to 36-row ears; ears generally 9 to 11 inches long; grains longer than any other variety. Many stalks bear 3 to 5 large ears. s me ears weigh 2 lbs, each, and contain 1,600 grains. The yield was 191 bushels of dry shelled corn to an acre." ALFRED ROSE, Yates Co., N. Y.

PRICE When the time and labor of selecting and preparing seed corn and the expense of advertising are considered, our price is very reasonable. Yet, with this corn, price should be no object, as you had better pay \$50 a bushel for seed of the Mastodon than plant ordinary kinds at market price. Here is a chance to make farming pay:

By mail, post paid, 1 large sample car 25c, 5 for \$1.00; 1 1b, 25c, 4 lbs. 75c. By freight or express, 5 bu. 50c, 1 bu. \$1.75, 1 bag 2% bu. \$4.00, 5 bu. or more at \$1 50 per bu.

------We have RILEY'S FAVORITE, IMPROVED LEAMING and PRIDE OF THE NORTH Seed Corn at same price as Early Mastodon.

Shelled Corn ON ONE

ACRE.

First Premium White Dent CORN ALWAYS A PREMIUM.

O The large ear is a fair representation of an ear 11 inches long reduced in size. The inches as platted are % of actual length, hence the ear is only % of actual length. The hill of corn will show style of growth, and with the picture of Mr. Trout, the originator, who is good sized man, to serve as a basis for comparison, a very clear idea can be had of this corn as it grows in the field. Mr. Trout is the champion corn grower of his county, and has been regularly excelling all his wide-aw ze neighbors in his corn product. We name it First Premium, because of the fact that it has been awarded ighest honors wherever exhibited. It is a pure ivory white corn on a white cob. Ears grow longer and not so thick as our Forsyth Favorite and grains do not average quite so long. The grains are of fine texture, smooth, compact, sound and heavy. Its purity in color adapts it for making White Meal and other corn products. Matures in 100 to 110 days, is finely adapted to all sections, south of a line 75 miles north of Indianapolis, and will give all growers great satisfaction in quality and productiveness. The names signed to the reports we publish below are among the wealthiest and most influential men in the neighborhood where this corn originated. All complete addresses are on file in our office: CELEBRATED

A NUMBER OF GOOD THINGS ARE LISTED ON THIS PAGE.

BROOM CORN There is a great demand for Broom Corn and we recom-mend farmers to plant some, even if no more than one acre. It is a paying crop, as big prices are big prices are paid for the brush, besides the seed is equal to cats for feed. Plant in drills

so it can be worked with cultivator.

IMPROVED EVER-**GREEN** is the best and pur-est in cultivation originated and selected by one of the largest growers of

Montgomery Co., Pa., who has for many years had the reputation of having the best in the state, having made his stock famous by selection and improvement for length, strength and gtraightness of brush. It is of a very bright green color, without the slightest reddish tinge. It makes by far the best brooms of any grown; height, 7 to 8 feet. Pkt. 8c, lb. 30c by mail. Peck 75c, bu. \$2.50.

ERGREEN

OM COR

NEW

SUGAR CANE Early Amber-The most al cultivation, ripening as far North as Min-nesota; very rich in saccharine matter, high ly prized for sugar and syrup-making pur-puration of the sugar and syrup-making purposes. It will also yield heavy crops of

poses. It will also yield heavy crops of seed, which is excellent for feeding poultry, swine or cattle. Pkt. 8c, lb. 25c, 4 lbs. 75c, by mail. By freight or express, peck 50c, bu. \$1.50. Early Orange-A later variety, suitable for the South or lower Middle

and Western States; requires a longer season to ripen; much larger and ranker in growth. Price the same as Early Amber.

JAPANESE BUCKWHEAT This variety is now well established and it is conceded by all who have grown it that ti yields twice as much as any other va-ricty. Has grains twice as large. Is much earlier and equals the best for flour. We sell very large quantities of the Japanese Buckwheat, and our experience has been so satisfactory that we can unhesitatingly advise every per-

where the contemplates raising Buck-wheat to procure this variety to sow, Pkt. 8c, lb. 25c, 4 lbs. 75c, By freight or express, ½ bu. 50c, bu. \$1.50, 5 bus. or more, \$1.25 per bushel.

Silver Hull-The next best variety. Price the same as Japanese.

MANSHURY BARLEY Six-row-ed, straw bright and very strong; does not lodge on rich ground; heads are long and drooping. Recomlong and drooping. Recom-mended by the Iowa Agricul-tural Experimental Station as the only variety suitable to grow in that State, and is equally valuable elsewhere. By mail, lb. 25c, 4 lbs. 85c. By freight or express, 1/4 bu. 50c, bu. \$1.25, 5 bus. or more, \$1.00 per bushel. MILLET German, or Golden Millet-The best variety and largely grown wherever its

value is known. It helps out wonderfully when a short crop is threatened, and produce 2 to 3 times as much hay per acre as timothy or clover. Three to five feet high. Sow broadcast, 1 bushel to the acre for hay; ½ bushel if for seed, from May Ist to August 1st. Pkt. 8c, 1b. 25c, 4 1bs. 75c. By freight or express, ½ bu. 35c, bu. \$1.00. Hungarian Millet-Early; helght two to three feet; abundant foliage and slender head; with-tends forught: vields well. Price same as Gen-

stands drought; yields well. Price same as German Millet.

FLAX SEED For sowing. By mail, lb. 25c, 4 lbs. 75c. By freight or express, 5c per pound.

ENSILAGE CORN.

Corn for ensilage or fodder purposes is in great demand in all dairy districts. What we offer can be relied upon for quick growth, big yields and nutritious qualities. We ship largely to all parts of the country.

Red Cob Ensilage-This superior ensilage corn we can fully recommend from experience as be-ing the heaviest cropping variety in cultivation, producing 50 to 75 tons per acre, A pure white Dent corn, of large size and handsome appearance.

The folder is sweet, tender, juicy. Hy mail, ib. 25c, 4 lbs. 75c, peck 40c, bu, \$1,25, 10 bus. and over, \$1.00 per bushel. Early Yellow Ensilage—This is a very early variety of corn: very leafy, fine stock, and the best to plant early for early use, or late as a second crop on vacant ground; can be planted as late as luft 1st Price same as above July 1st. Price same as above.

Correspond with us for price of large quantities of Ensilage Corn,

SPRING VETCHES Tares

-Sow on rich, well prepared soil. Is excellent, either for feeding in green state or dried like hay. When al-lowed to ripen, the pea-shaped kernels furnish an excellent futtoning ford. excellent fattening food; a good substitute for corn. When grown for hay, it is sown as late as sown as late as July, with oats, and both to-gether are rel-ished by stock. Grown for the grain, sow in Apespecially for hogs to feed and fatten on. Sow $1\frac{1}{2}$ bu. per acre, broadcast. By mail, pkt. 10c, 1b. 25c, 4 lbs. 75c. By ex. press or freight, ¹/₄ bu. 75c, bu. \$2.50.

FIELD PEAS Many of the first farmers of West are the planting peas as a stock fattener, especial-ly so for hogs. They are equal to the best corn

for this pur-pose. Sow at the rate of 2 bus. per acre, broadcast. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, ¹/₄ bu. 50c, bu. pkt. 1 \$1.75.

S1.75. RAPE DWARF ESSEX-A wealth producing plant. No enterprising stock raiser can afford to be without a sufficient acreage of Rape to meet the re-quirements of his fock of sheep and other stock. Send immediately to the U. S. Department of Agricultural Washington, D. C., for a free copy of the Farmer's Bulletin, The Rape Plant. Pixt. 10c, 1b. 40c, 4 lbs. §1.50. By Greight or express, per lb. 20c.

German, or Gol dep Millet.

(54)

the grain undigested. The hull of Calgarry is soft and ane in texture. To illustrate, place one hand in a bag of Calgarry gray and the other in a bag of any other oats. The Calgarry will feel soft and velvety, while the other will feel harsh and woody. Again, grasp a handful tightly, withdraw your hands from the sacks, open them, and the Calgarry will slip from your hand like an eel, while the other will have penetrated the skin of the hand so as to hold many of the oats. All these good qualities, combined with a larger percentage of kernels to berry than any other, makes absolutely the best feeding oats in cultivation. The Calgarry Gray otats Grow very dwarf, even on strong ground; seldom exceeding 3 feet in length, while 2½ feet is about the average length. This is a great point for those farmers who have rich ground. Nothing short of a moderate of all. These oats can be put in shock before Welcome Bonanza, While Russian, etc., turn yellow. This qualthey escape the hot sun, dry weather, storms and rust that prevail about the time ordinary sorts mature. In the important matter of productiveness they have outyielded all other sorts where placed in competition in experiments and in ordinary field culture. The extracts from reports of the Illinois Agricultural

The extracts from reports of the Illinois Agricultural Experiment Station, given below, will be very interesting and speak volumes.

Extracts, from Illinois Experiment Station Report.

Yield, per acre, Calgarry Gray, 54.5 bushels. Ripe, Calgarry Gray, July 25. Per cent. of kernel in berry, Calgarry Gray, 77.43. In the experiments, the abovewariety led in the parlicular points mentioned; the number of varieties tested was 59. The average yield was 39.8. The average per cent. of kernel to berry was 69.57.

"I think the Calgarry Gray Oats are superior to any other oats I ever raised. They excel in yield other kinds 10 to 15 bushels per acre. Extra early and my crop weighs 42 pounds per bushel, struck measure. They stand up best and mature plump and heavy under the hottest sun, where other oats are killed." S. J. BARRETT, Ford Co., III.

⁴ The fame of the Calgarry Oats having spread to my neighborhood, I took pains to test them, and I am happy to be able to say that the results have more than equaled the recommendation given them. They mature earlier and excel in productiveness and quality any kind that I have heretofore grown." P. TRAVIS, Barry Co., Mich.

"I take great pleasure in testifying to the merits of the Calgarry Gray Oats. I find them to be free from rust, of great weight of grain, straw very strong and are a long ways the best feeding oats I have ever known. Extremely early; in fact, the earliest oats I ever grew." FRANK L. SKINNER, Ford Co., Ill.

PRICE OF CALGARRY GRAY OATS.

Remember these are a distinct strain of oats. They will be sought after for seed purposes and we will not be surprised if they make the greatest stir among seedsmen and oat raisers known since the introduction of the Welcome Oats a number of years ago. By mail, pkt. 10c, 1 lb. 25c, 4 lbs. 75c. By freight or express, ½ bu. 50c, 1½ bu. for 1 acre, \$2.00, per bag of 3 bus. for 2 acres, \$3.50.

SUPERIOR SOTON ONTS. -EVERITT'S WHITE SUPERIUR SUULIN UALS. The Heaviest Variety of Oats Ever Sold in the United States.

Televerster acre.

Heldover

Choice Cleaned Crops Weigh 50 lbs. to the Measured Bushel.

Compare this Weight with common oats at 32 pounds, and oftentimes less. Why grow chaff and straw mainly, when with this variety you can get plump, heavy grain that makes muscle, bone and fat, when fed to your stock? Here's a chance to make farming pay.

VERITT'S WHITE SUPERIOR SCOTCH OATS-Surpasses all others in heavy weight, thin hull, shortness and plumpness of To others in neavy weight, thin null, shortness and plumphess of grain, strength of straw and productiveness. In short, they are the most profitable for farmers to grow and merchants to handle. Their produc-tiveness, weight, and fine qualities place them at the head of the list. They ripen evenly and very early, and notwithstanding they bear a very large, spreading head, filled completely with the plump grains almost as heavy as wheat, they stand up stiff and straight until fully matured. They have a degree them to righ bottom ground where experiments of the standard standard where they are strained on the standard straight where the standard strong straw adapts them to rich bottom ground, where common oats will fall down and waste. One of our growers reports a yield of 15F/ bus. per acre, actual weight. These are the oats we offer you, and when you see them you will not be surprised that such enormous yields are possible. Ground that will yield 50 bus, of common oats as usually grown will yield 100 bus, of these.

grown will yield **100 bus.** of these. The following truthful, responsible farmers, who live in the neigh-borhood where our crops are grown, endorse them as being very early, with stiff straw, extremely heavy and productive, and altogether a profitable variety to grow: Demas Bricker, Louis Fitzenburg, Chas. H. Coe, Col. I. P. Larimore, J. R. Headington, Ephraim Daily, Samuel Morey, Wm. Matton, Chas. Twining, L. S. Halt, J. G. Case, and E. W. Hawkins. These farmers all live in Knox county, Ohio, and would not misrepre-sent an article, but add their names and testimony to these fine oats as evidence of their worth, and with the hope that their brother farmers will prefit by their observations. They were exhibited at the Hartford (0.) Fair under the name of "Everitt Oats," and received the flartford verify by their observations. They were exhibited at the Hartford (0.) Fair under the name of "Everitt Oats," and received the first premium, and a special recommendation for their *fixe quality* and *great* weight by the Committee on Farm Grains. Committeemen—Wm. H. Perkins, Geo. N. Jackson, A. K. Sutton.

Want of space forbids us publishing hundreds of testimonials that we have received. Below is a sample:

GEO. W. MYEES, who has threshed grain for thirty years, says: "The White Superior Scotch Oats have a good straw, ripen even and very early. For yield, weight and quality they are superior to any other variety I have found in an experience of thirty years threshing farm grain."

Who would not grow these oats in preference to the light, chaffy kinds, which make up the main crops of the country? BE PROFESSIVE, Get a variety of oats, the like of which you never saw before, which contain so much vigor that they will produce a crop regardless of the season. The price is low enough that you can sow a field or your entire crop. Sow largely of these oats for profit.

PRICE OF EVERITT'S White Superior Scotch Oats. Remember these oats weigh nearly double common oats to the measured bushel. We give the standard weight, 32 lbs. for a bushel. By mail, post paid, 1 large pkt. 10c, 1 lb. 25c, 4 lbs. 75c. By freight or express, 1/4 bu. 40c, 11/2 bu. for 1 acre \$1.75, 3 bus. (1 bag), for 2 acres \$3.25, 6 bus. (2 bags), \$6.00. Any larger quantity at \$1.00 per bu. New bags free.

You can well afford to pay \$1.00 per bu. for these oats for seed, and this is as low as we can offer to sell them and pay advertising expenses. We have sold thousands of bushels of them since we first introduced them, at much higher prices.

CAUTION We manned and introduced the While Superior Scotch Oats and can furnish the genuine article. Another house claims they fur-nished the seed of this variety that was given an award at the World's Fair. Ask them for official evidence. Come into our house and see the documents. We furnished the seed and have the award.

If there is one department of our business in which we excel more particularly than another it is the **Seed Potato Department**. We have always made great specialities of **Seed Potatoes**. Although we do not introduce one-fourth as many varieties as do some other seedsmen, yet when we send out a new variety it goes out to find a welcome and a home with every grower. Our conservative course has gained for our house the confidence of potato raisers and as a consequence our trade is not excelled in this line by any house in the country.

POTATO EYES OR WHOLE POTATOES. Within the past few years many seedsmen have and devote considerable space to explaining the beauties and advantages of the potato eyes by mail and devote considerable space to explaining the beauties and advantages of the potato eye scheme. It is a good scheme to talk on and will influence some orders from the inexperienced, but it is all wrong. Within one week aft. The potatoes are cut they have lost a great share of their vitality and if obtained early in the season before planting time has arrived the chances are you have lost one-half of them entirely and the balance will make only a feeble growth. **We send by mail, medium size, sound, whole tutoes and from 50 to 80 eyes.** One pound of potato eyes will comprise from 25 to 35 eyes, and they will not have much flesh at this rate. Note the difference; **besides**, by our improved method of preparing seed and planting we make one whole potato equal to 3 as usually handled, and that without any extra labor or delay in planting. Will send particulars with every order if requested.

STILL UNEQUALED.

The Wonderful Six-Weeks Market Potato. Without exception the earliest Potato in existence and the most valuable for market gardeners, truckers and all early Market purposes. A perfect table potato and a wonderful yielder.

INTRODUCED BY US IN 1890.

Ready for Market in SIX WEEKS. Matures in 72 days. Two weeks ahead of any other variety and has yielded at the rate of over 600 bushels per acre.

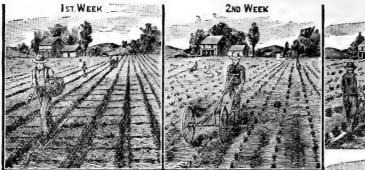

AGAIN LEADS FOR 1895.

Others may equal it in size, quality or productiveness, but in earliness EVERITT'S SIX-WEEKS' MARKET IS UNAPPROACHED.

Market Gardeners and all others who grow potatoes, what could you afford to give for potatoes that will produce fine, large, beautiful tubers six weeks from planting, which is two or more weeks ahead of any other kind, if you knew they would positively produce such results? Well, we will say to all who are

fortunate enough to receive this catalogue that EVERITT'S EARLY SIX-WEEKS

SIX-WEEKS (Continued on page 58).

MA RKET will do all this. It is worth its weight in gold for a start of seed to many market gardeners, as with it they can get the fancy prices before other kinds come in market. We offer for consideration the accompanying report from the originator, who has been a potato grower all his life, and is now 54 years old, and from others whose addresses are on file in Our office. After reading these reports you can no longer doubt that this is a most remarkable variety. This new potato originated in Ohio and we purchased of the originator the entire stock and right to introduce it. The "They have created so much excitement in my neighoriginator says: borhood that I could sell my whole crop to my neighbors at a fancy price Grows medium to large size, oblong to round shape, light, flesh-colored skin; White flesh; very smooth shape; eves even with the surface; tubers grow close together in the hill. The vines are only four to five inches high. same, while nearly, very school shape, eyes even with the school where the series of the state o mature so early that potato bugs have no chance at all, making their crop, if

planted early, before the young bugs become numerous; while for yield they are wonderful, considering their extreme carliness. In 1888 the yield was at the rate of 420 bushels per acre; in 1889 they the yield was at the fate of 420 busiles per acre, in how dry yielded at the rate of over 380 bushels per acre without ma-nure; while in 1891 they yielded at the rate of over 600 bushels per acre. The originator says about this potato: "Potatoes have been my favorite crop since I was a boy and I al-

ways took great pleasure in seeing what good crops and large yields I could get, but never did I see a nicer potato than this. I have raised a great many kinds, sent for the earliest in the catalogues, and have raised them from seed, and got some very good ones, but none that came up to my ideal of a perfect potato until I originated this. I have now discarded all others, and raise this for early and main crop, for market and home use. I am fully convinced that I have at last produced the best early potato in cultivation. lt combines more good qualities than any other variety in the world.

Grown on a light gray soil, and without manure or fertilizer, they yielded at the rate of 380 bushels per acre, which can be increased by potato manure.

In a careful comparative test with three other varieties, each of which have been claim-

ed to be the earliest, the following results were obtained: Al were planted May 2 Everitt's Six-Weeks Market matured in 72 days; yield, 420 bus. per acre. Stray beauty matured in 87 days; yield, 189 bushels per acre. Chas. Downing matured in 92 days; yield, 350 bushels per acre. Early sunrise matured in 100 days; yield, 378 bushels per acre. This test shows this new potato to be fifteen days earlier than any of the above and far more productive.

REPORTS.

See reports on next page We can not afford to give full address, as then orders that should come to us might go to these people, and we could not pay our expenses. We could print hundreds more space permitted.

and the second second

JRD WEEK

READ HOW THIS POTATO IS LIKED BY ALL WHO GROW IT. "THE LIKE WAS NEVER SEEN BEFORE.

The photo-engraving on page 57 was made direct from pototoes sent us by John L. Saum, of Paulding Co., O., who writes as follows:

who writes as follows: Me. J. A. EVERIT, Dear Sir-I send you to-day by freight the product of forty hills of Six-Weeks Potatoes. They were dug last night and this morning and grew in forty-three days. They were grown from one-eye seed. I have just begun farm-ing on my own land, and am not fixed yet for pushing a crop of early potatoes. These were covered with a breaking plow and given very ordinary treatment. Think I can beat it next season. Several people who saw them were astonished. I expect to exhibit at our county fair." John L. SAUM. "The Six-Weeks Market potatoes take the cake. All the seeds I buy from J. A. Everitt beat the world." Mr. W. H. Powzens, Bradford Co., Pa." I like the Six-Weeks Potatoes they are the best he ever saw. They are excellent keepers. They are the best he ever saw. They are excellent keepers. They are the best he ever saw. They are excellent keepers. They are the best he ever saw. They are excellent keepers. They are the best he ever saw. They are excellent keepers. They are the best he ever saw. They are excellent keepers. They are the best he ever saw. They are excellent keepers. They are the lass in every respect." "The Early Six-Weeks Potatoes did well with me. I could sell a car load for seed here if I had them." JOHN B. COCHRAN, Jeff. Co., O.

John B. Cocrana, Jeff. Co., O. John B. Cocrana, Jeff. Co., O. "One pound Early 6-Weeks Market Potato yielded 147 pounds of fine, sound, smooth tubers. Ripened in 75 days, and produced marketable potatoes in 6 weeks, as you claimed. This is the most valuable variety of pota-bes ever introduced "

BEST TOOLS FOR FARMERS AND GARDENERS.

the most valuable variety of pota-toes ever introduced." R. TAYLOR, Ashland, Co., Wis. "You have got it this time -- I mean the best early and the earliest potato in existence. We had the Early 6-Weeks Market Potato large enough for the table in 6 weeks from planting. They outyielded all our planting. The other varieties.

other varieties. AUGUST BROENKNEE, (Gardener), Allegan Co., Mich. "**\$10** per bushel would not buy my Early 6-Weeks Market Potatoes, if I could not replace them for less. They are the earliest of all, and a heavy yielder. I predict they will be universally grown by market gardeners for early, and those gar-deners who get them first will resp handsome profits."

and a sho get hem first will reap handsome profits." JACOB E. STITSON, Onondaga Co., N. Y. "My Early 6-Weeks Market Pota-toes have proved to be as early as you represented them, and a fine yielder; sound, smooth and best juality. They are very valuable." C. E. WARD, Sullivar. Co., Ind. "The Early 6-Weeks Market Po-tato was the best for the yield and the earliest I had this season. They are one to two Iweeks earlier than the Early Ohio." N. NYEDAN, Marion Co., Ind. "Planted the Early 6-Weeks Market Potato May 3. They grow fine, and we had new potatoes cooked June 20. They are the earliest we ever saw."

are the earliest we ever saw." DANIEL DONOVAN, Carroll Co., Tenn. "Our Early 6-Weeks Market Potato produced over one hun-dred fine potatoes, that made a bushel, measured. They are the earliest to make market potatoes, and the earliest to ma-ture of any I ever saw." JOIN GILBERT, Meek Co., Va. "Twenty hills of Early 6-Weeks Market Potatoes yielded a heaped bushel. They bear out your claims for earliness, guality and productiveness. Thanks for calling my attention to them." <u>EMIL LAURENCE</u>, Worcester Co., Mass. "I would give hundreds of dollars to control the growing of the Early 6-Weeks Market Potato of any other sort.

of the Early 6-Weeks Market Potato for this market, as they can be put on the market two weeks ahead of any other sort, which means hundreds of dollars' profit to a large grower." W. HENRY MORRIS, Cuyahoga Co., O. "You can not praise the Early 6-Weeks Market Potato too much. Gardeners should not think of doing without them. I dug 50 bushels off ¼ acre, beginning 6 weeks from planting, which averaged me 50c a peck. They are wonderful." G. R. HIXON, Madison Co., Ill.

"The 6-Weeks potatoes have done well for me. Last sea-son, when nearly all kinds dried up, they gave me a good crop of fine, large potatoes, nearly a full yield, and tubers large, with very few small ones; quality excellent, very early; also they were awarded first prize at our fair, where many kinds competed." J. W. BAKER, Bureau Co., Ill. "The Early 6-Weeks have done well for us. The only trou-ble is they come on first to eat, and we generally use them all up before others come." C. C. SHAW, Licking Co., O. "The Early 6-Weeks are grand. We had fine potatoes in 6 weeks from planting; dry and mealy as old potatoes. Early Ohio came three weeks later." L. S. JOHNSON, Clearfield Co., Pa.

Ohio came three weeks later." L. S. JOHNSON, Clearfield Co., Pa. "The Early 6-Weeks Market Potato is splendid. I find them the best table potato I have had since the Peachblow run out." GEO. G. Cotrony, Sac Co., Ia. "I consider the Early 6-Weeks Market Potato the earliest at the bard of the bard of the bard of the second

and the best potato I have ever raised."

and the best potato I have ever raised." G. SAMUEL MCKAY, Tipton Co., Ind. "The Early 6-Weeks Market Potato did exceedingly well; raised at the rate of 400 bushels per acre; some weighed 1½ pound. We think the cooking quality better than the Early Ohio's, and they are earlier and better yielder." S. HOFFMAN, Preble Co., O. "Am well pleased with the Early 6-Weeks Market Potato. It is the very finest quality for ta-TEDS AND CARDENERS ble. a good cropper, free from rot

ble, a good cropper, free from rot and bugs.

A. E. STUALEY, Knox Co., Me. "The Early 6-Weeks Potatoes are all you claim for them. They are very early and good yielders. Planted them the 19th of April, and the last of June (6 weeks) they were ready to dig, and good size, too; no marbles."

too; no marbles." A. FENTON, Monroe Co., N. Y. "The Early 6-Weeks Market is the best table potato in flavor I ever handled, and yield in abund-ance." BENJ, GEMEERLING,

ance." BENJ, (BEMBERLING, Licking Co. 0, "The Early 6-Weeks Market Po-tato excels all. The tubers are larger, mature earlier, and in all respects are superior to others that I have tried." B.T. JANNEY, D.C. "The Early 6-Weeks Market Po-tato did well in every respect. They are extra early cook meely

tato did well in every respect. They are extra early, cook mealy, good yielders, of nice size, average yelded over 5 heaping bushel bas-kets." GEO, W. RICHARDSON, Morrison Co., Minn. "Out of seventeen kinds of pota-toes planted, your Early 6-Weeks ness. I really think they are the best potato on earth." C. CARROLL, Pirestone Co., Minn.

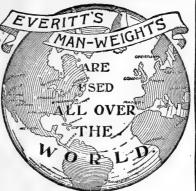

ness. I really think they are the best potato on earth." C. CARROLL, Pipestone Co., Minn, "Those 6-Weeks Market Potatoes were true to your state-ment, In just 6 Weeks from planting, dug good-sized pota-toes." E. W. ANTHONY, Houghton Co., Mich. "They are the best early potatoes, taking yield, size and quality into account, of and potato I have ever tested, and have tried nearly every kind I could hear of." W. H. MILLER, Winnebago Co., Ill. "The 6-Weeks Market Potato made 50 bushels more per acre than the Ohio, our standard potato; am well pleased

"The 6-Weeks Market Potato made 50 bushels more per acre than the Ohio, our standard potato; am well pleased with them." J. M. G. WATT, Douglass Co., Kas. ""Tis now six weeks and five days since I planted the 6-Weeks Market Potatoes. They did not sprout very quick, but they have nice, large tubers on them. Are the earliest potato for this climate I ever saw. I thank you a thousand times." C. L. RICEL, Armst ong Co., Pa. "The Early 6-Weeks did fine, and were fit to use two weeks before the Early Ohios." W. A. TROP, Highland Co., O. "Six-Weeks Potatoes done very well. All the seed from you did well." C. L. Fostrer, Knox Co., Me.

We have hundreds of reports equally as good, but lack of space will not allow us to publish.

Price of Early Six-Weeks Market Potatoes. 1 lb. 30c, 4 lbs. \$1.00, by mail post paid. By freight or express, 1 peck, 75c, bu. \$1.25, 1 bu. \$2.50, 1 bbl. \$6 00, 2 bbls. \$11.00, 5 bbls. \$27.00.

Don't conclude that the price is too high. You can not well pay too much. Those people who bought small lots years ago have made big money from their investment. The price of the EARLY SIX-WEEKS MARKET is not likely to be very low in future years, as they come so early and command such a high price in market that very few are saved for seed.

See Page 80 and Last Cover Page.

THE GREAT KING OF POTATOES The **GREEN MOUNTAIN** Wonderful

The greatest yield ever known, at the rate of 1,391½ bushels per acre, is recorded for the GREEN MOUNTAIN. This potato has had the greatest sale of any of our introductions, yet there are neighborhoods where they are unknown. Our advice is, obtain them at once. Our perpetuated stock is as productive and of as fine quality now as when first offered.

To secure this potato, we paid the enormous price of \$300 for one and one-half barrels, the entire original stock.

THE WONDERFUL GREEN MOUNTAIN POTATO

OF THIS POTATO WE PAID \$200.00 E FOR THE ORIGINAL SLOCK

This wonderful medium late potato was raised from seed This wonderful medium late potato was raised from seed borne on the Dunmore, impregnated with pollen from the Excelsior, originated in Vermont, and was introduced by us in 1885. That it is an extraordinary and exceedingly valuable variety there is not a doubt. Its handsome form, white skin and large size recommend it everywhere. The flesh is white and fine grained, cooks dry and mealy, and is of superior flavor. This is the case when first dug, and they retain their good cooking qualities and keep sound and perfect until the new crop comes again. As a variety to keep for late good cooking qualities and keep sound and perfect until the new crop comes again. As a variety to keep for late apring use it has no equal. Vince grow vigorously, foliage deep green, the tubers grow compactly in the hill, which is completely crowded with fine, large po-tatoes. They ripen in August if planted in April, and in the important institer of productiveness they are perfectly marvelous. This quality combined, as it is, with fine appearance and good table qualities, makes the Green Mountain one of the most valuable late varieties in the country, and in supplanting all other late potatoes in sections where it has been introduced. Read the reports from the Rural New Yorker Experimental grounds:

sections where it has been introduced. Read the reports from the Rural New Yorker Experimental grounds: **Green Mountain Pointon** was planted April 7 and the crop harvested August 27, the variety being, therefore, a late intermediate. They were dug under the supervision of E. Williams, Secretary of the New Jersey Horticultural Society, and Charles L. Jones, of Newark, N. J., who, with the editor of the Rural New Yorker, weighed and estimated the yield, which was at the rate of 1,391 1-2 BUSHIELS FER ACIRE. There was an average of 11 2-5 to the hill and an average of 3-4 lbs. to the hill. They were planted two eyes to the hill, one foot apart, in rows three feet apart.

This is the largest yield of potatoes ever raised on these Experimental Grounds. E. S. CARMAN, Editor.

Also, from a letter from the Ecitor of the Rural New Yorker, under date of December f. we quote: "Of all the **potatoes we have ever tested. this Green Moun-tain yields the most.** It is an **immense yielder**." Again Mr. Carman wrote as under date of October 17, after trying them the second year: "The Green Mountain Potato surprises me. They yield well, considering the desperately bad season. They were the best of any (there were nine of the best varieties he could select from all over

the country) in the half acre poor soil plot, and yielded at the rate of 280 Bushels per acre. This yield is, for a horrible season, the worst we have had for years, a very fine one. Had the season been at all favorable we would have DOUBLED the yield easily." It should be remembered that the soil on which the above potatoes were grown was very poor. This kind of soil was selected parposely. There is probably no person in the country who is a better judge of new potatoes than Mr. Carman, and such words as above coming from him must carry great weight. To secure con-trol of this new variety we paid the enormous price of \$200 per barrel for the original stock. The Green Mountain Potato is positively one of the best things we offer in our catalogue, and we guarantee them to not only give entire satisfaction, but they will surprise potato growers by their great yield and fine qualities. We know, if we were able to convince each person who receives this cata-logue of their real merits, not the least exaggerated, that the demand would be so great that it would be impossible to sup-ply it. You will not be disappointed in this potato. By mail, post-paid, 1 bb. 25c. 4 bbs. 75c. By freight or express. 1-4 bu. 50c, 1 bu. \$1.75, bbl. \$1.50, 9 ubl.. or more at \$1.25 each.

SAMPLE REPORT.

(We have received thousands as good since we

That sold this famous potatols, first sold this famous potatols, The Green Mountain Potato surprised everybody in this section of the country. They yield about double our other kinds, and are just right for fancy city trade. Bankers and merchants are having me fill their cellars at 10 to 20 cis, per bu, above the market. I will grow no other for main crop until the Green Mountain surger the trade of the solution of the solutio bu, above the market. I will grow no other for main crop until the Green Mountain runs out, then I hope you will have another to take its place. S. E. GARBEE, Hamilton Co., O.

CAUTION.

To our knowledge certain unscruppilous par-ties have sold other inferior varieties of pota-toes for Green Mountain, thus defaming their fair name and justly great reputation. We cau-tion all parties to buy where they will get the genuine article, and thus avoid disappointment.

he RURAL NEW YORKER POTATO.

(61)

JTO all our customers who have bought of us in the **1** CO all our customers who have bought of us in the past such celebrated potatoes as the Mammoth Peart, O.K., Mammoth Prolific, the Everitt Green Mountain, and the early Six-Weeks' Market, we an-nounce that this Rural New Yorker No. 2 is worthy their careful attention and extensive cultivation. Thorough trials, both in America and in Europe, have proved it to be one of the most valuable sorts. It is entitled to stand abreast with our cust

It is entitled to stand abreast with our great Green Mountain as a general cropper. We are ready to stake our reputation on the Rural New Yorker

Potato pleasing our customers. It is intermediate in season, ripening about September Ist if planted about May 1st. Very distinct and beau-tiful in appearance, differing from any other variety. The general shape is shown by the illustration, except oftentimes they run abruptly to a point at the stem end. They are flattened, being much broader than thick through. This is a very valuable feature, as no difference how large the tubers grow (and they grow very large) they will always cook through quickly and evenly. Skin is white, surface very smooth, with even 1st if planted about May 1st. Very distinct and beauevenly. Skin is white, surface very smooth, with eves perfectly even. Flesh of the whitest and has not a su-perior as a table potato. We particularly emphasize the great vigor of growth of this variety, which enables it to resist disease, blight and bugs to a remarkable degree and widd heavy corps even in unfavorable seesong to resist disease, bight and bogs to a remarkable degree and yield heavy crops even in unfavorable seasons. Our own crops and reports from our customers places it well in the lead in point of productiveness. In six crops selected, the average yield was 429 bush-els per acre. The Rural New Yorker has received more favorable reports from the agricultural press than any other variety in late years, therefore it is not necessary to dwell on its merits in this catalogue. We guarantee our seeds to please and the crop to be highly satisfactory. \dot{a}

REPORTS FROM CROWERS.

of magnificent potatoes. A \$10.00 bill would not tempt me to

"The Rural N. Y. No. 2 Potatoes have sustained your high recommendation. They are the finest and best I ever raised. and the like of them was never seen here before. I could sell all at a big price if I wanted to part with them, but want to keep all for seed." J. F. NYE, Stark Co., O.

Above are samples of a great 3.7. IVE, Stark Co., O. Above are samples of a great many reports that want of space will not permit us to publish. Price by mail, 1 lb. 25c, 4 lbs. 75c. By freight or express, ½ bu. 50c, bu. \$1.75, bbl. \$4.50, 2 bbls. \$8.50, 5 bbls. or more at \$4.00 per bbl.

CET NEW BLOOD.

A great many opportunities are lost in this world for want of a little courage. Why wait until next year to improve your crops? This year will never come back. Use it now and when next year comes you can improve it also. If you wait to consult your brothers and uncles and cousins about this or that thing, the chances are the season is past before you decide. This plan would and cousins about this of this time the plan would do before the fiood, when men lived several hundred years. In this nineteenth century, when everything goes with a rush, you must keep up with the procession or be trodden in the dust.

We have always preached the necessity of changing ed frequently. We know it costs a little money to seed frequently. We know it costs a little money to start with. We are sorry there are so many expenses connected with the seed business, as we want to sell at prices that will make it possible for everybody to get our seeds

The following combination will allow those people. who can not buy large quantities of each, on account of lack of money or will not on account of lack of faith,

to get a start and see what improven on take of haltd, made year after year. It should be very popular: FOR \$5.00 We will send you i bbl. 22 bushels made up as follows: 4 bus each Everitt's Colossal, Rural New Yorker, Early Everitt, Green Mountain and Early Six Weeks Market Potatoes; "I am able to report very satisfactorily on the Rural New Yorker Potato. They meet my ideas of a perfect potato ex-actly. The yield is large; quality superb. Appearance rec-ommend them in every market; resist drought and bugs; free from disease and unexcelled for winter keeping." P. W. COLLINS, La Salle Co., III. "From 1 pound Rural N. Y. No. 2 Potato I raised 204 pounds

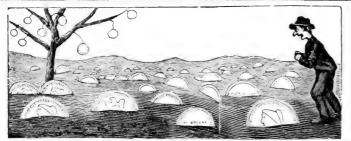

evidence that we regard it with great favor, and that our reputation as potato experts will not suffer when it is put to the severe test of general cultivation.

Every person who receives this catalogue should avail himself of the opportunities presented to make money. The new potatoes we offer will be in demand for seed until all growers are supplied. If one enterprising person in each neighborhood will undertake to grow a crop of them, he will find a market for them at home at a high price. Many a great business had a small beginning; as an illustration, the business which this catalogue represents is the direct result of 50 cents invested in a new variety of potatoes, not a great many years ago.

The price of Everitt's Colossal Potato we will make moderate, so every person can get a small or large amount without delay

By mail, post paid, 1 lb. 30c, 4 lbs. §1.00. By freight or express, ¹/ bu. 75c, bu. §2.50, 1 bbl. §6.00. We will send 1 bbl. Colossal and 1 bbl. of Everitt's Onward for \$11.00. One barrel will plant one acre, or equal three barrels by our improved process of preparing the seed. Full particulars will be sent to every purchaser, if requested.

The actions of O.K. Seeds are indeed manifold As by the scene above one plainly can behold. Applied to the ground they make a crop of gold

A thing too marvelous, almost, to be told.

wonders never cease, and O. K. Seeds never fail

Such a crop of dollars, the man fairly qualls! He calls in his neighbors, they have a jubilee, And thrice, thrice hurrah for O.K. Seeds.

(62)

POTATOES BY MAIL.

See remarks " Potato Eyes or whole Potatoes" on page 57. There are many people who want only a few pota-toes, or living at such a great toes, or living at such a great distance the transportation charges would prevent them being sent by freight or ex-press. To these we advise our potatoes by mail in boxes as shown above. With each order will be sent full particulars of our improved method of preparing the method of preparing the seed, which makes 4 pounds equal 12 pounds as ordinarihandled. 15

THE GREAT EARLY CROPPER. →*A GREAT MONEY POTATO **

EARLY VERITT.

Every Potato Grower Needs a Medium Early Variety. This is the Best of This Class.

> WE are not inclined to boast of our achievenor inments dulge in self-glorification, but we must be excused for referring to what we have done in the Seed Potato line. No other house in the country can show such a record as we in this particular branch of our business. We have always made a great specialty of Seed Potatoes, and sell an immense quantity every year, fre-

sell an immense quantity every year, fre-quently shipping a hundred bushels or more to large growers in different States of the Union, and supply other seedmen in car load lots. We are well acquainted with all the varieties now in cultivation, and for the guid-ance of our customers we do not hesitate to state that our **EARLY EVERITT** is the most productive early potato now in cultivation, coming three weeks after our Early Six-Weeks Market, and is so productive that it is planted by some large growers for both early and late crops. Its fine form is shown by the accompanying engraving; cyes even with the surface; col-or of skin light pink. A most beautiful potato in shape and color. Flesh is fine, solid, white, and of surpassing quality for the table. Growth strong and rapid, setting tubers very early, which attain a large size in a very short time, and ripen with the Early Rose. Tubers grow very large, frequently weighing over two pounda apiece. Yield astonishes old potato growers, who acknowledge they never had so productive an early potato. No grower who is ambitious to make the most money out of potatoes should tail to grow the **EARLY EVERITT POTATO**.

Below we print a few testimonials, which are only a few taken from hundreds that we have received praising this fine potato, but which lack of room prevents us from publishing:

"From 1 lb. of Early Everitt Potatoes I raised 63 lbs. of fine tubers, many weighing over 1 lb. each, notwithstanding the unfavorable season (no rain from July 1st to 10th). I an very much pleased with them and will plant all next season, as they appear to be exactly suited to our soil." HIRAM PRESLEY, St. Clair Co., Mich.

"The peck of Early Everitt Potatoes yielded 15 bus. My Green Mountains took first premium at our county fair over 10 varieties." R. E. CHAMBERS, Owen Co., Ind. 10 varieties."

"The Early Everitt has proved to be a very fine potato, yielding with me as high as one bushel from 15 eyes of seed, or a bushel to the rod of row, or 800 bushels per acre. I dug specimens to-day that weighed 2 pounds each." S. R. MUTH, Junean Co., Wis.

"One pound Early Everitt Potatoes yielded 2 bus. of as nice potatoes as I ever saw. Mrs. Raines thinks the quality better than the Early Rose."

H. RAINES, Hendricks Co., Ind.

"One tuber of Early Everitt Potatoes made 8 hills and raised 100 potatoes. Some weighed 34 lbs. each." ALBAN PROST, Perry Co., Mo.

"I planted the ½ lb. Early Everitt Potato on the 6th of July and dug them on the first of October. The weather was very dry through June, July and part of August. The ground had no manure for six years, and I had 43 lbs; one mea-sured 20 inches around lengthwise and weighed 2½ lbs. I shall keep them all to plant next year." F. R. COLLINS, Elkhart Co., Ind.

"From ½ lb. Early Everitt Potatoes I raised 35 lbs. of such nice, smooth potatoes as are seldom seen. My common kinds were almost a failure on account of dry weather, the Early

Everitt yielding four times as much and better quality." G. A. PHILIPPI, Outagamie Co., Wis.

"From ½ lb. of Early Everitt Potato I raised 20 pounds of the **nicest potatoes I ever saw**. The Shepard Radian is the largest I ever saw." A. F. HAND, Clinton Co., Ia.

PRICE—By mail, post-paid, 1 lb. 25c, 4 lbs, 75c, By freight or express, ½ bu. 50c, 1 bu. 81.75, bbl. 84.50, 2 bbls, 88.50, 5 bbls, or more at 84.00 per bbl. You can afford to plant largely of this potato.

HYBRIDIZED POTATO SEED.

New varieties of potatoes are originated by planting the small seed taken from the balls that grow on potato tops. The best varieties are usually produced from hy-bridized seed. This is seed that contains the blood from two or more varieties mingled. We offer the best hybridized seed that is bound to produce valuable new varieties. Pkt. 20c.

SOUTHERN CUSTOMERS By our favorable lo-cation, neither in the extreme ice-bound north, nor in the warm sunny south, we are able to keep our potatoes over winter in prime condition, and yet can ship southern orders from March Ist to 15th, putting them in the hands of our southern customers in time for first early planting, direct from our cellars, at moderate charge for freight.

FULL ADDRESS Of each party whose testimonial for O. K. Seeds and Potatoes we print in this catalogue is on file in our office. If we were to give the complete address, orders would go to them for what surplus they may have, and we would be left stranded with no income to pay our advertising expenses. This by way of explanation.

EVERITT'S CELEBRATED MAN-WEIGHT

FARM AND GARDEN TOOLS.

(Continued from page 16. See also last cover page. Send for complete Catalogue.)

does complete work at one operation. No after-hoeing is required.

3. As is evident, the power obtained, the amount of work that can be done and the quality of the work are far in excess of any other hand tool, nearly equaling horse power in quantity, while the quality of the work is

ar superior to horse power work.
a. In an orchard where a horse can not be taken, and where the work is too heavy for other hand machines, these fill the bill to perfection. By one man pulling ahead, sod or other ground can be broken up.
b. Double the amount can be raised on a given piece

b. Double the amount can be raised on a given piece of ground than with a horse plow. This is accomplished by closer planting and frequent cultivation.
6. Many gardeners and small farmers can save the **Expense** of keeping a horse.
7. Plants can be cultivated *rapidly and often*, hence mature carlier, with a greater yield. In this way the machines can be made to pay for themselves several force accent accent. times every year.

"I have been using the hand push cultivators, but the Man-Weight is far ahead of them." H. A. SIMMONS, P. M., Clinton, Mich.

# Everitt's "Perfection" Broad-Cast Seed Sowers.

For Sowing Wheat, Oats, Rye, Rice, Flax, Grass Seed, Clover Seed, etc. In fact, any kind of Seed Broad-Cast.

No careful, economical farmer will continue to sow his seed by hand (the old style) when he can get one of these machines at our reduced prices. They will save their cost almost daily in saving of seed, to say nothing about saving of time and more even distribution, which will have a great effect on the crop.

They will Sow from 4 to 8 Acres per Hour at a Common Walking Gait.

These machines when first invented sold for \$15.00 each. These machines when first invented sold for \$15.00 each. Valuable labor-saving, seed-saving, crop increasing ma-chines. The seed is not thrown upward, but distributed right and left evenly, and will save at least one-third the seed used in hand-sowing. They are operated by a trans-verse motion of the bow, or a crank which revolves the distributor and works the vibrator rapidly. It is the only seed sower having a satisfactory vibrator which prevents the seed from clogging. They are quickly adjusted to sow any quantity desired. The grain sack holds one bushel, made strong, well fluished and weighs about four pounds. It will last many years. At a roun i will sow wheat 50 feet, buckwheat 48 feet, flax seed 36 feet, grass seeds from

48 feet, flax seed 36 feet, grass seeds from 27 to 36 feet. These are the best ma-chines ever invented for the purpose, and should be in the hands of every farmer. Satisfaction guaranteed.

PRICE—Bow Seeder, each, §2. Crank Seeder, each, §2.50. Agents wanted. See below. For 25 cents cach, extra, we will pay expressage to any point cast of the Rocky Mountains.

BUSINESS. Have you some spare time? You can turn it into You money by selling our Broad-Cast

A GOOD

guarantee these machines. They are light, and can be carried or hauled from house to house. Nearly every person will buy them when they see them. We have no confidential terms. Any person can engage in this business. The only condition is you must order a certain number, to show that you are buying to sell again. Bow Seeder-Retail price, \$2.00 (they sell for \$2.50 to \$3.00 elsewhere). We sell them to you by the dozen, ½ dozen or ½

Bow Seeder-Retail price, \$2.00 (they sell for \$2.00 to \$3.00 the worth \$3.00 to \$4.00. We sell them by the doz,  $\frac{1}{2}$  doz, or  $\frac{1}{2}$  doz. **815.00**. Trank Seeder-Retail price, \$2.50. They are worth \$3.00 to \$4.00. We sell them by the doz,  $\frac{1}{2}$  doz, or  $\frac{1}{2}$  doz. **815.00**. To a day at this business, It is a remarkable fact that very few farmers have ever seen these machines. Yet they are so necessary in soving all kinds of seeds broadcast, that once they see and try one, they could not be induced to part with it. They will save about  $\frac{1}{2}$  the seed over hand sowing, save half your time, make your work easier and distribute the seed evenly, thus greatly increasing the crop. (64)

A FINAL WORD! Since you have examined this Catalogue through to the last page, we trust you are ready to place your order for 0. K. SEEDS. We certainly have tried to merit your patronage by placing before you a catalogue of moderate expense, and giving you every advantage possible in price and quality of goods. We believe you are an intelligent reader, and can see that the facts bear out our statements. Others may tell you their seeds possess some wonderful qualities that make them superior to all others, and charge two prices for them. DON'T BE DECEIVED.

The Quality of O. K. Seeds is never reduced, if we do reduce price. Buy them at the moderate price we ask, and keep the balance of money in your pocket.

In closing our Annual Catalogue we assure all who order from it that their orders, whether for 10 cts. or \$100.00 worth of goods, will receive the most careful attention, and shipment will be made at once. WE ARE ALWAYS AT YOUR COMMAND.

J. A. EVERITT, SEEDSMAN.

SEE INSIDE PAGES FOR FULLER DESCRIPTIONS

View No. 1 on this page shows the Man-Weight aking up the ground. It is not intended to break breaking up the ground. It is not intended to break up very hard ground, although if a man or a boy pulls ahead, almost any work in this line can be done. To loosen up ground that has become compact, it is

View No. 2 pulverizes the ground after it is broken up, and destroys weeds at a great rate. View No. 3 makes furrows to receive seeds,

potatoes, etc., and covers the seed.

View No. 4 covers seed in rows, or banks up earth on both sides of the plants.

View No. 12 is an onion harvester, and the best one made. The adjustability of our drag bars, moving sidewise or up and down, makes the work lighter and

View No. 5 is the best drill made. It plants all kinds of seeds, in hills or drills, as desired, covers and marks out the next row. Small farmers need not buy an expensive corn drill. This will do the work as well, and the cultivators will take care of the crop as it grows, thus doing away with much machinery, also

saving the expense of keeping a horse. Views 6, 7, 8, 9, 10, 11, are adapted to al-most all kinds of cultivation and weeding. When you know what you want to do, you can construct the machines to accomplish the desired results.

PRICE. The Man-Weight cannot be sold as cheaply as some old style machines. They are made on the same plan as the large two horse cultivators. Yet when the quantity and quality of work they will do is considered, as well as the ease of doing it, they would be cheap at twice the price we ask.

. . \$6.00 Single Wheel Machine with 5 sets of tools . Combined Single and Double, 5 sets of tools . . 8.00 Combined Single and Double, and Drill No. 5 . 12.00

Evenits' Man-Weight Machines, although invented and patented in 1891, are already sold all over the world where seeds are sown and plants grown. Ask your dealer for Evenitt's Man-Weight. If he does not keep them and will not get them, send direct to us. Don't be influenced to take any of the old style machines. Life is too short, time too valuable, and competition too great, to waste your energies with them.
